Deterrence Thom Brooks, 2019-11-11 Deterrence is a theory which claims that punishment is justified through preventing future crimes and is one of the oldest and most powerful theories about punishment The argument that punishment ought to secure crime reduction occupies a central place in criminal justice policy and is the site for much debate Should the state deter offenders through the threat of punishment What available evidence is there about the effectiveness of deterrence Is deterrence even possible This volume brings together the leading work on deterrence from the dominant international figures in the field Deterrence is examined from various critical perspectives including its diversity relation with desert the relation of deterrence with incapacitation and prevention the role deterrence has played in debates over the death penalty and deterrence and corporate crime **The Victims' Rights Movement** Michael Vitiello, 2025-06-03 Outlines the successes and failures of the movement to support survivors of violence The Victims Rights Movement VRM has been one of the most meaningful criminal justice reforms in the United States Every state and the federal government has adopted major VRM laws to enact protections for victims and increase criminal sanctions and the movement has received support from politicians of all backgrounds Despite recognition of its excesses the movement remains an important force in the criminal justice arena The Victims Rights Movement offers a measured overview of the successes and the failures of the VRM Among its widely acknowledged accomplishments are expanded resources to help victims deal with trauma greater sensitivity to sexual assault victims in many jurisdictions and increased chances of victims receiving restitution from perpetrators of harm Conversely the movement has led to excessive punishment for many defendants and destruction of defendants families It has exacerbated racial inequality in the imposition of the death penalty and criminal sentencing generally and falsely promises closure to crime victims and their families Michael Vitiello considers whether the VRM serves those injured by crime well by focusing on victimhood He urges a reframing of the movement to fight for universal health care and limits on access to weapons two policies that would reduce the number of victims and help those who do become victims of crime *The Concept of Mens Rea in International Criminal Law* Mohamed Elewa Badar, 2013-01-30 The purpose of this book is to find a

Submarine Cables Douglas R. Burnett, Robert Beckman, Tara M. Davenport, 2013-10-24 Submarine fiber optic cables are critical communications infrastructure for States around the world They are laid on the seabed are often no bigger than a garden hose and transmit immense amounts of data across oceans These cables are the backbone of the internet and phone services and underpin core State interests such as the finance sector shipping commerce and banking industries Without the capacity to transmit and receive data via submarine cables the economic security of States would be severely compromised Despite the fact that 95 per cent of all data and telecommunications between States are transmitted via submarine cables there is little understanding of how these cables operate As a result some States have developed policies and laws that

undermine the integrity of international telecommunications systems Submarine Cables The Handbook of Law and Policy provides a one stop shop of essential information relating to the international governance of submarine cables The Handbook is a unique collaboration between international lawyers and experts from the submarine cable industry It provides a practical insight into the law and policy issues that affect the protection of submarine cables as well as the laying maintenance and operation of such cables In addition the law and policy issues in relation to other special purpose cables such as power cables marine scientific research cables military cables and offshore energy cables are also addressed
