John Willard

Introduction

WAN Technologies CCNA 4 Lab Study Guide is a supplement to your classroom and laboratory experience with the Cisco Networking Academy Program. Specifically, this book covers the fourth segment of the CCNA curriculum. In order to be successful on the exam and achieve your CCNA certification, you should do everything in your power to get yourself with a variety of tools and training materials to support your learning efforts. This Lab and Study Guide is just such a collection of tools. Used as instructed, it will help you learn the knowledge as well as practice the skills associated with the content area of v1.1.1 of the CCNA v WAN Technologies course. Specifically, this book will help you with the four main areas of CCNA 4:

- Network Address Translation
- Dynamic Host Configuration Protocol
- DHCP leases, ranges and pools
- Frame Relay

Goals and Methods

The most important goal of this book is to help you prepare for either the CCNA exam (200-401) or the RNE exam (200-401). Whether you are studying for the beta exam or the second part of your CCNA, passing either of these exams means that you not only have the required knowledge of the technologies covered by the exam, but that you can plan, design, implement, operate and troubleshoot those technologies. In other words, these exams are rigorously application based. In fact, if you view the exam objectives for the CCNA exam at <http://www.cisco.com/go/ccna/objectives>, you will see the following four categories of objectives:

- Planning & Design
- Implementation & Operations
- Troubleshooting
- Technology

Although Technology is listed last, a CCNA student cannot properly plan, design, implement, operate and troubleshoot networks without first fully grasping the technology. You should allocate a significant amount of time and effort in the Study Guide section of each chapter learning the concepts and theories before applying them in the Lab Exercises.

The Study Guide section offers solutions that help you learn the concepts and configurations needed to pass success as a CCNA exam candidate. Each chapter is slightly different and includes notes on all of the following types of exercises:

- Troubleshooting Mitigation and Configuration
- Concept Questions
- Answer Reworks
