Paradigms in Theory Construction Luciano L'Abate,2011-12-01 Within the field of psychology there is a proliferation of paradigms theories models and dimensions without an underlying conceptual framework or theory This conclusion has been reached by representatives of many different psychological specialties In response to this inconsistency this book presents a hierarchical framework about important theoretical issues that are present in psychological thinking These issues concern definitions of three major theoretical concepts in theory and practice a paradigms b theories and c models It focuses on defining comparing and contrasting these three conceptual terms This

framework clarifies differences among paradigms theories and models terms which have become increasingly confused in the psychological literature Paradigms are usually confused with theories or with models while theories are confused with models Examples of misuses of these terms suggest the need for a hierarchical structure that views paradigms as conceptual constructions overseeing a variety of psychological theories and verifiable models
