tasks allow students to truly do mathematics Written with a strengths based lens and an attentiveness to all students this guide includes Complete task based lessons referencing mathematics standards and practices vocabulary and materials Downloadable planning tools student resource pages and thoughtful questions and formative assessment prompts Guidance on preparing launching facilitating and reflecting on each task Notes on access and equity focusing on students strengths productive struggle and distance or alternative learning environments With concluding guidance on adapting or creating additional rich tasks for your students this guide will help you give all of your students the deepest most enriching and engaging mathematics learning experience possible

Early Childhood Mathematics Skill Development in the Home Environment Belinda Blevins-Knabe, Ann M. Berghout Austin, 2016-10-17 This volume presents current research on the connections between the home and family environment on children s mathematics development Focusing on infancy through first grade it details the role of parents and other caregivers in promoting numeracy and the ways their active participation can prepare young children for learning about formal mathematics Research data answer key questions regarding the development of numeracy alongside cognitive and linguistic skills early acquisition of specific math skills and numeracy of children with atypical language skills The book also provides practical recommendations for parents and other caregivers as well as implications for future research studies and curriculum design Included in the coverage Ways to optimize home numeracy environments Individual differences in numerical abilities Cross cultural comparisons and ways to scaffold young children s mathematical skills Mathematics and language in the home environment Center based and family based child care Games and home numeracy practice Early Childhood Mathematics Skill Development in the Home Environment is an essential resource for researchers graduate students and professionals in infancy and early childhood development child and school psychology early childhood education social work mathematics education and educational psychology

Mathematics for Tomorrow's Young Children C.S. Mansfield, N.A. Pateman, N. Bednarz, 2013-03-09 Social constructivism is just one view of learning that places emphasis on the social aspects of learning Other theoretical positions such as activity theory also emphasise the importance of social interactions Along with social constructivism Vygotsky s writings on children s learning have recently also undergone close scrutiny and researchers are attempting a synthesis of aspects of Vygotskian theory and social constructivism This re examination of Vygotsky s work is taking place in many other subject fields besides mathematics such as language learning by young children It is interesting to speculate why Vygotsky s writings have appealed to so many researchers in different cultures and decades later than his own times Given the recent increased emphasis on the social nature of learning and on the interactions between student teacher and context factors a finer grained analysis of the nature of different theories of learning now seems to be critical and it was considered that different views of students learning of mathematics needed to be acknowledged in the discussions of the Working Group
