Critical Childhood Studies Practice Interdisciplinarity:

Critical Childhood Studies and the Practice of Interdisciplinarity Magdalena Żółkoś, Joanne Faulkner, 2016 This book analyzes different figurations of childhood in contemporary culture and politics with a particular focus on interdisciplinary methodologies of critical childhood studies It argues that while the figure of the child has been traditionally located at the peripheries of academic disciplines perhaps most notably in history sociology and literature the proposed critical discussions of the ideological symbolic and affective roles that children play in contemporary societies suggest that they are often the locus of larger societal crises collective psychic tensions and unspoken prohibitions and taboos As such this book brings into focus the prejudices against childhood embedded in our standard approaches to organizing knowledge and asks is there a natural disciplinary home for the study of childhood Or is this field fundamentally interdisciplinary peripheral or problematic to notions of disciplinary identity In this respect does childhood force innovation in thinking about disciplinarity For instance how does the analysis of childhood affect how we think about methodology What role do understandings of childhood play in delimiting how we conceive of our society our future and ourselves How does thinking about childhood affect how we think about culture history and politics This book brings together researchers working broadly in critical child studies but from various disciplines in the humanities and social sciences including philosophy literary studies sociology cultural studies and history in order to stage a conversation between these diverse perspectives on the disciplinary or interdisciplinary character of the child as an object of research Such conversation builds on the assumption that childhood far from being marginal is a topic that is hidden in plain sight That is to say while the child is always a presence in culture history literature and philosophy and is often even a highly charged figure within those fields its operation and effects are rarely theoretically scrutinized but rather are more likely drawn upon surreptitiously for another purpose

Critical Childhood Studies and the Practice of Interdisciplinarity Joanne Faulkner, Magdalena Zolkos, 2015-12-14 This book analyzes different figurations of childhood in contemporary culture and politics with a particular focus on interdisciplinary methodologies of critical childhood studies It argues that while the figure of the child has been traditionally located at the peripheries of academic disciplines perhaps most notably in history sociology and literature the proposed critical discussions of the ideological symbolic and affective roles that children play in contemporary societies suggest that they are often the locus of larger societal crises collective psychic tensions and unspoken prohibitions and taboos As such this book brings into focus the prejudices against childhood embedded in our standard approaches to organizing knowledge and asks is there a natural disciplinary home for the study of childhood Or is this field fundamentally interdisciplinary peripheral or problematic to notions of disciplinary identity In this respect does childhood force innovation in thinking about disciplinarity For instance how does the analysis of childhood affect how we think about methodology What role do understandings of childhood play in delimiting how we conceive of our society our future and ourselves How does thinking about childhood affect how we think

about culture history and politics This book brings together researchers working broadly in critical child studies but from various disciplines in the humanities and social sciences including philosophy literary studies sociology cultural studies and history in order to stage a conversation between these diverse perspectives on the disciplinary or interdisciplinary character of the child as an object of research Such conversation builds on the assumption that childhood far from being marginal is a topic that is hidden in plain sight That is to say while the child is always a presence in culture history literature and philosophy and is often even a highly charged figure within those fields its operation and effects are rarely theoretically scrutinized but rather are more likely drawn upon surreptitiously for another purpose Critical Childhood Studies and the Practice of Interdisciplinarity Joanne Faulkner, Magdalena Zolkos, 2015-12-14 This book analyzes different figurations of childhood in contemporary culture and politics with a particular focus on interdisciplinary methodologies of critical childhood studies It argues that while the figure of the child has been traditionally located at the peripheries of academic disciplines perhaps most notably in history sociology and literature the proposed critical discussions of the ideological symbolic and affective roles that children play in contemporary societies suggest that they are often the locus of larger societal crises collective psychic tensions and unspoken prohibitions and taboos As such this book brings into focus the prejudices against childhood embedded in our standard approaches to organizing knowledge and asks is there a natural disciplinary home for the study of childhood Or is this field fundamentally interdisciplinary peripheral or problematic to notions of disciplinary identity In this respect does childhood force innovation in thinking about disciplinarity For instance how does the analysis of childhood affect how we think about methodology What role do understandings of childhood play in delimiting how we conceive of our society our future and ourselves How does thinking about childhood affect how we think about culture history and politics This book brings together researchers working broadly in critical child studies but from various disciplines in the humanities and social sciences including philosophy literary studies sociology cultural studies and history in order to stage a conversation between these diverse perspectives on the disciplinary or interdisciplinary character of the child as an object of research Such conversation builds on the assumption that childhood far from being marginal is a topic that is hidden in plain sight That is to say while the child is always a presence in culture history literature and philosophy and is often even a highly charged figure within those fields its operation and effects are rarely theoretically scrutinized but rather are more likely drawn upon surreptitiously for another purpose Critical Childhood Studies Kay Tisdall, John Davis, Deborah Fry, Kristina Konstantoni, Marlies Kustatscher, Catherine Maternowska, Laura Weiner, 2023-08-10 The book provides an advanced accessible text for childhood studies which is suitable and challenging for those coming from practice different parts of the world and from a range of disciplines Key ideas within childhood studies are introduced from agency to intersectionality to children's rights Addressing children and young people under the age of 18 the book combines concepts from seminal texts with challenging critical views and alternatives to stimulate readers to develop their own analysis and apply the results to

Childhood and Innocence in American Culture James M.

Curtis,2023-08-01 This collection argues that the romanticized conflation of childhood and innocence in American culture has been on a steady decline at least since the 1960s largely due to postmodern critiques of overarching narratives involving both the child and the innocence of childhood Additionally this collection highlights and analyzes examples of children s literature and culture throughout the 20th century and into the 21st which pointedly defy traditional idealized notions of childhood Such an analysis serves to reiterate the idea that the romanticized notion of childhood which has pervaded American culture for over two centuries is little more than a cultural construction that bears little to no resemblance to the actual lived experience of American children

Cold War Children's Television Vibiana Bowman Cvetkovic,2023-10-16 Cold

War Children s Television Philadelphia as a Case Study examines a culturally significant phenomenon of the Cold War the locally produced hosted children s show The Cold War era and the coming of age of commercial television were entwined not only chronologically but societally The era of the locally produced hosted show closed in the wake of Sesame Street due to shifts in social policy industry economics and rising expectations for children programming Through the lens of cultural and historical analysis this book reveals that beyond that nostalgia lies a vital visual form that thrived in the Cold War era one that reflected the ideals of childhood media and nation of a societal terrain from which the American children s television host emerged

Child and Youth Agency in Science Fiction Ingrid E. Castro,Jessica Clark,2019-10-15 Child and Youth

Agency in Science Fiction Travel Technology Time intersects considerations about children s and youth s agency with the popular culture genre of science fiction As scholars in childhood studies and beyond seek to expand understandings of agency in children s lives this collection places science fiction at the heart of this endeavor Retellings of the past narratives of the present and new landscapes of the future each explored in science fiction allow for creative reimaginings of the capabilities movements and agency of youth Core themes of generation embodiment family identity belonging gender and friendship traverse across the chapters and inform the contributors readings of various film literature television and virtual media sources Here children and youth are heterogeneous and agency as a central analytical concept is interrogated through

The Child in World Cinema Debbie Olson,2018-02-19 This collection seeks to broaden the discussion of the child image by close analysis of the child and childhood as depicted in non Western cinemas Each essay offers a counter narrative to Western notions of childhood by looking critically at alternative visions of childhood that does not privilege a Western ideal Rather this collection seeks to broaden our ideas about children childhood and the child s place in the global community This collection features a wide variety of contributors from around the world who offer compelling analyses of non Western non Hollywood films starring children

Misfit Children Markus Bohlmann,2016-12-14 Misfits are often confused with outcasts Yet misfits rather find themselves in between that which fits and that which does not This volume is interested in this slipperiness of misfits and explores the blockages and the promises of such movements as well as the processes and conditions that produce misfits the means that enable them to undo their denomination as misfits and the practices that turn those who fit into misfits and vice versa This collection of essays on misfit children produces transmissible motions across and engages in scholarly conversations that unfold betwixt and between in order to make rigid concepts twist and twirl and ultimately fail to fit

Screening Children in Post-apocalypse Film and Television Debbie Olson,2023-11-16 This collection examines the child s role in contemporary post apocalyptic films and television By exploring the function of child characters within a dystopian framework this volume illustrates how traditional notions of childhood are tethered to sites of adult conflict and disaster a connection that often works to reaffirm the rightness of past systems of social order
