De Medicalizing Misery Psychiatry Psychology And The Human Condition:

De-Medicalizing Misery M. Rapley,J. Moncrieff,J. Dillon,2011-10-12 Psychiatry and psychology have constructed a mental health system that does no justice to the problems it claims to understand and creates multiple problems for its users Yet the myth of biologically based mental illness defines our present The book rethinks madness and distress reclaiming them as human not medical experiences

De-Medicalizing Misery II E. Speed,J. Moncrieff,M. Rapley,2014-09-16 This book extends the critical scope of the previous volume De Medicalizing Misery into a wider social and political context developing the critique of the psychiatrization of Western society It explores the contemporary mental health landscape and poses possible alternative solutions to the continuing issues of emotional distress

Medicalizing Counselling Tom Strong,2017-09-18 This book discusses how counselling a profession known for diverse and innovative practices has recently been influenced by scientific marketplace and administrative developments corresponding with a medicalized focus on psychiatric diagnoses and related evidence based treatments Tensions associated with this medicalized focus refer to competing logics and accountabilities regarding how to understand and address concerns brought to counselling Tom Strong reviews such tensions as they relate to counsellors approaches to practice experienced as incompatible with a medicalized approach The role of media and technology therapy culture and counsellor education are examined with respect to medicalizing tensions that professionals and clients of counselling increasingly face The book will interest readers who share concerns regarding the potential for a mental health monoculture grounded in the diagnose and treatment logic of medicalized counselling

Mad Studies: The Basics Merrick Daniel Pilling,2025-05-19

Mad Studies The Basics provides an introductory account of a field that emerged from and must remain grounded within community knowledge activism and the perspectives of those who have experienced madness and mental health systems It is a concise text that introduces the field through an exploration of some origins of Mad Studies as well as two interrelated queries what does Mad Studies help us understand and what does Mad Studies help us do This exploration reveals that Mad Studies is an interdisciplinary intersectional and multi vocal field that demands different answers to the very meaning of the beliefs behaviours and bodymind experiences that are currently characterized as being indicative of mental illness At the heart of Mad Studies is a liberationist desire to resist transform and abolish the systems that create marginalization and implement responses to madness that are grounded in the collective knowledge of those deemed Mad This book shows that the contributions of Indigenous Black racialized queer and trans people must be understood as central to and already embedded within Mad Studies and activism rather than as add ons expansions or efforts to make Mad Studies more inclusive It will be of interest to all scholars and students of disability studies social work gender studies education health sciences sociology and psychology as well as practitioners in mental health care and those with lived experience of madness and mental health systems

Patterns in Interpersonal Interactions Karl Tomm, Sally St. George, Dan Wulff, Tom Strong, 2014-05-16 In this book we present a comprehensive view of a systemic approach to working with families initiated by Karl Tomm more than two decades ago at the Calgary Family Therapy Centre in Canada The contributors of this edited book articulate the IPscope framework as it was originally designed and its evolution over time We invite you experienced professionals and new family therapists to join with us to explore some of the mysteries of human relationships While the focus on our explorations revolves around clinical mental health problems and initiatives towards solutions the concepts are applicable in many domains of daily life They highlight the ways in which we as persons invite each other into recurrent patterns of interaction that generate and maintain some stability in our continuously changing relationships The stabilities arise when our invitations become coupled and can be characterized as mutual yet they always remain transient What is of major significance is that these transient relational stabilities can have major positive or negative effects in our lives Consequently we could all potentially benefit from greater awareness of the nature of these patterns how particular patterns arise and how we might be able to influence them

The Palgrave Handbook of Innovative Community and Clinical Psychologies Carl Walker, Sally Zlotowitz, Anna Zoli, 2022-02-01 This handbook highlights a range of ground breaking radical and liberatory clinical and critical community psychology projects from around the world The disciplines of critical community psychology and clinical psychology are currently experiencing radical innovations that in this book are characterised as moving from the individualising practice realm toward an altogether more contextualising orientation Both fields are responding to an array of political social and economic injustices and a global political context Community and clinical psychologists have found themselves reorienting their practice to confront resist and subvert the structures that are so damaging to the lives of the vulnerable people they work with This text posits that these approaches refute and resist the psychologising that has strengthened oppressive structures Such practices are starting to engage in the political character of power knowledge relationships that demand a more action oriented and less clinical

psychology praxis and there is a growing interest in and commitment to social justice in the field of mental wellbeing Using examples of scholar activist and practitioner work from around the world this collection explores and documents those practices where the traditional remit of community and clinical psychology have been subverted altered stretched changed and reworked in order to reframe practice around human rights creativity political activism social change space and place systemic violence community transformation resource allocation and radical practices of disruption and direct action
