Nursing Care Plans Marilynn E. Doenges, Mary Frances Moorhouse, Alice C. Geissler, 1993-01-01 This widely used reference continues to be a reliable guide for both students and nurses involved in constructing individualized patient care plans. It is the first care plan reference to include collaborative interventions. This edition includes three introductory chapters on the nursing process, care planning, and the documentation process, comprehensive guidelines for plans which encompass total patient needs, and 90 tear out care plans. *Nursing Care Plans* Marilynn E. Doenges, Mary Frances Moorhouse, 2000 Doenges a clinical specialist Moorhouse a nurse consultant and Geissler a contract practitioner nurse consultant all working out of Colorado Springs Colorado designed this text for both the practicing nurse and nursing student as a reference tool to use in acute care, community, and homecare settings. Following introductory chapters on current issues in healthcare and care plan construction, the book is organized by body systems, presenting plans of care including information to assist the nurse in providing holistic care. The enclosed CD ROM includes sample care plans for 172 disorders which can be customized to fit specific patient needs. Annotation copyrighted by Book News Inc, Portland OR. *Clinical Nursing Pocket Guide* Healthcare Consultant Intuitive Options Marilynn Jackson, PhD MA RN, Marilynn Jackson, Lee Jackson, 2007-06 Just 3x5 fits into the palm of your hand. This convenient pocket guide contains all the information clinical nurses need at their fingertips on the hospital floor: instructions, basic conversion charts, assessment checklists, scales, tables, anatomies, lab tests, charting, medication indications and administration, and other basic information for quick reference.

Nurses' Guide to Clinical Procedures Jean Smith-Temple, 2010 **The PEACE Model Evidence-Based Practice Guide for Clinical Nurses** Joyce Fitzpatrick, Reynaldo Rivera, 2021 Nurses are in charge of the patients and their families throughout the hospital and health system experience. They assist patients through illness to achieve higher levels of health. They coordinate the care throughout the patient's experiences with the healthcare system. Nurses are the leaders of patient care at the bedside and beyond. It is important that as clinical leaders, nurses have the most accurate, most up to date, and evidence based information available so that they can always do the right thing. The PEACE model develops clinical nurses as leaders in care of both patients and their families. Clinical nurses, those at the point of care, have embraced this model for guiding their practice. The PEACE model helps clinical nurses solve challenging problems through a rigorous evidence based practice process from problem identification to evaluation and dissemination. The crux of the PEACE model is the mnemonic that simplifies the evidence based practice (EBP) process for clinical nurses. The PEACE model is used across New York Presbyterian NYP, one of the nation's most comprehensive academic healthcare delivery systems. NYP is composed of 10 hospitals in New York and employs more than 11 000 nurses across the enterprise. One striking advantage of the model is that it emerged from the work of clinical nurses who were struggling to find a way to remember and apply the components of other EBP models. The mnemonic PEACE promotes understanding and application by clinical nurses, providing a way to easily

remember the EBP component stages The uniqueness of the PEACE model is its simplicity This relevance leads to continued application in day to day nursing practice As we strive for peace at many levels of our lives and work the mnemonic is easy to remember The PEACE model may be adapted to any setting where nurses practice **LPN Notes** Ehren Myers,2016-03-03
