De Man Die Zijn Vrouw Voor Een Hoed Hield:

On the Edge of Human Imagination Michel Thys, 2025-04-30 In this fascinating book Michel Thys explores the limitations of human imagination and symbolization showing the potentially destructive result of a mind that cannot confront reality His wide ranging research takes us into the domain of the unimaginable unthinkable and unspeakable Divided into four parts On the Edge of Human Imagination sees Thys adopt a phenomenological perspective to move through experiences encountered in the analyst's room from depression and psychosis to PTSD Through a dialogue with philosophers such as Jean Paul Sartre Maurice Blanchot and Emmanuel Levinas Thys investigates the relationship between fascination identification socio cultural phenomena and aesthetic pleasure Throughout he uses the paintings of Edward Hopper Sophocles Antigone Mary Shelley's Frankenstein Franz Kafka's Metamorphosis and Charlie Chaplin's Modern Times to support his ideas Integrating Freudian Kleinian and Bionian theories he shows the psychic impact of humanity's attempt to balance fear and passion on the edge of the imaginable and the liminality of the search for meaning The book brings together psychoanalytic theory and practice and philosophical anthropology confronting in the end Freud's ideas of the death drive with Sartre's understanding of the desire for being as the main driving force in human existence This book offers an illuminating evaluation of what it means to be human making it an important read for psychoanalysts psychologists and psychotherapists as well as philosophers interested in the intersection between psychoanalytic philosophical and phenomenological thought

On Being Normal and Other Disorders Paul Verhaeghe, 2020-10-20 Winner of the 2005 Goethe Award in Psychoanalytic Scholarship The central argument of On Being Normal and Other Disorders is that psychic identity is acquired through one's primary intersubjective relationships Thus the diagnosis of potential pathologies must also be founded on this relation Given that the efficacy of all forms of treatment depends upon the therapeutic relation a diagnostic of this sort has wide ranging applications Paul Verhaeghe's critical evaluation of the contemporary DSM diagnostic shows that the lack of reference to an updated governing metapsychology impinges on the therapeutic value of the DSM categories In response to this problem the author sketches out the foundations of such a metapsychology by combining a Freud-Lacanian approach with contemporary empirical research Close attention is paid to the processes of identity acquisition to show how the self and the Other are not two separate entities Rather subject formation is seen as a process in which both the subject's and the Other's identity as well as the relationship between them comes into being By engaging this new theoretical approach in a constant dialogue with the findings of contemporary research this book provides a compass for the practical applications of such a differential diagnostic Post modern categories of anxiety disorders personality disorders and post traumatic stress disorders are approached both through the well known neurotic psychotic and perverse structures as well as through the less familiar distinction between an actual pathology and a psychopathology These two outlooks which involve the role of language and the subject's relation to the Other are spelled out to show their implications for treatment at every turn
