

DEMOCRATIC GOVERNANCE AND NON-STATE ACTORS

ANNE-MARIE GARDNER

Democratic Governance And Non State Actors

Ann Capling, Patrick Low

Democratic Governance And Non State Actors:

Democratic Governance and Non-State Actors A. Gardner, 2011-02-14 This book investigates whether international standards of good governance are applied to sub state actors as well as to states By examining the international response to self determination claims this project demonstrates that the international community does indeed hold sub state groups accountable to such standards

Non-State Actors as Standard Setters Anne Peters, Lucy Koechlin, Till Förster, Gretta Fenner Zinkernagel, 2009-09-24 This analysis of globalised standard setting processes draws together insights from law political sciences sociology and social anthropology to assess the authority and accountability of non state actors and the legitimacy and effectiveness of the processes The essays offer new understandings of current governance problems including environmental and financial standards rules for military contractors and complex public private partnerships such as those intended to protect critical information infrastructure The contributions also evaluate multi stakeholder initiatives such as the Extractive Industries Transparency Initiative and discuss the constitution of public norms in stateless areas A synopsis of the latest results of the World Governance Indicator arguably one of the most important surveys in the area today is included

Governments, Non-State Actors and Trade Policy-Making Ann Capling, Patrick Low, 2010-09-09 One of the most pressing issues confronting the multilateral trade system is the challenge posed by the rapid proliferation of preferential trade agreements Plenty has been written about why governments might choose to negotiate preferentially or multilaterally but until now it has been written almost exclusively from the perspective of governments We know very little about how non state actors view this issue of forum choice nor how they position themselves to influence choices by governments about whether to emphasize PTAs or the WTO This book addresses that issue squarely through case studies of trade policy making and forum choice in eight developing countries Chile Colombia Mexico South Africa Kenya Jordan Indonesia and Thailand The case studies are based on original research by the authors including interviews with state and non state actors involved in the trade policy making process in the eight countries of this study

Forming Transnational Dispute Settlement Norms Shahla F. Ali, 2021-05-28 This thought provoking book examines whether regional centres associated with global legal institutions facilitate expanded citizen engagement in global soft law making Through an analysis of empirical research into the role of decentralized soft law making in the East Asian region it investigates the influence of such regional centres in overcoming representational deficits in the design of cross border dispute settlement norms

Rethinking Global

Democracy in Brazil Markus Fraundorfer, 2017-11-01 In recent years a growing literature has focused on how to create more effective and democratic global governance mechanisms to better tackle global challenges such as health epidemics global hunger Internet surveillance or the consequences of climate change Yet there is a gap in accessible published material to reflect contributions of democratic states from the global South Among these democracies from the global South Brazil is a popular case for teachers and researchers looking to study global governance mechanisms This book provides students

with a framework that challenges the Western centred views on questions of how to democratise global governance processes arguing that developing democracies from the global South have developed serious and sustainable approaches to a more democratic global system With chapters on Brazil s responses to global food security the purchase of drugs open government initiatives and internet governance this book opens up contemporary and novel practices of democracy for examination

The Relationship between Human Security Discourse and International Law Shireen Daft, 2017-12-01 The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual but also challenges the current priorities of the international community In particular it places emphasis on promoting and facilitating a nexus between security development and human rights It is potentially a paradigm in the making gaining considerable momentum within the UN international relations scholarship and regional bodies And yet by and large it continues to be unexplored by the international legal community despite the success of a number of international treaties being attributed to the discourse This book seeks to address this gap and establish the nature of the relationship between human security discourse and international law determining whether human security can meaningfully contribute to the international legal framework To determine this the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law The book examines the how the broad narrow debate that dominates human security discourse has played out in international law making It goes on to consider the processes for the creation of so called human security treaties in order to determine a blueprint for future development of international human security treaty law In concluding Shireen Daft sets out a structured principled approach through which international legal scholarship can engage with human security highlighting the ways in which engagement between the two fields can be sustained

Non-State Actor Dynamics in International Law Cedric Ryngaert, 2016-05-06 Non state actors have always been treated with ambivalence in the works of international law While their empirical existence is widely acknowledged and their impact and influence uncontested non state actors are still not in the centre of international legal research The idea that non state actors are not law makers however stands in sharp contrast with the growing notion of non state actors as law takers This book examines the position of non state actors in international law as law makers and law takers and questions whether these different positions can or should be separated from each other Each contribution reveals both the political and normative aspects of the question as well as the positivistic possibilities and constraints to accommodate non state actors as law takers and law makers in the contemporary international legal system Altogether each expert reveals that the position of non state actors in international law is not a fixed one but changes with the functional and theoretical perspectives of the observer *Non State Actor Dynamics in International Law* is a welcomed addition to an under researched field of legal study An indispensable read to scholars and policy makers wishing to gain new insights into general discourse on non state actors in international law and the process of

norm formation in the international realm

The Regulation of Product Standards in World Trade Law Ming

Du, 2020-11-12 This monograph has two central purposes The first is to provide a critical analysis of how governmental private and hybrid product standards are regulated in the GATT WTO legal framework The second purpose is to explore both positively and normatively the impact that WTO disciplines may have on the composition function and decision making process of various standard setting bodies through the lens of a series of selected case studies including the EU eco labelling scheme ISO standards and private standards such as the FSC The book analyses what role if any the WTO may play in making product standards applied in international trade embody not only technological superiority but also substantive and procedural fairness such as deliberation representativeness openness transparency due process and accountability Whilst it has been long recognised that voluntary product standards drawn up by both governmental and non governmental bodies can in practice create trade barriers as serious as mandatory governmental regulations a rigorous and systematic inquiry into the boundary relevance and impact of WTO disciplines on product standards is still lacking Providing a lucid interpretation of the relevant WTO rules and cases on product standards this book fills this significant gap in WTO law literature Definitive and comprehensive this is an essential reference work for scholars and practitioners alike

The Evolution of Transnational Rule-Makers through Crises Panagiotis Delimatsis, Stephanie Bijlmakers, M. Konrad

Borowicz, 2023-08-10 Renowned experts from various academic disciplines theoretically and empirically explore the dynamic evolution and resilience of transnational rule makers through crises

The Diplomacy of Culture I. Kozymka, 2014-04-16 Cultural diversity because it is perceived to have significant security developmental and social implications is fast becoming one of the major political issues of the day At the international level it overlaps with the now extensive debates on multiculturalism within states This work shows how cultural diversity challenges the understanding of international relations as relations between states and by looking at the issue through the magnifying glass of an international organization offers innovative insights into the interplay between various levels of international society The book examines in particular the role of UNESCO the only United Nations agency responsible for culture and the main forum for international diplomacy on the issue of cultural diversity
