Cerebral Hyperemia the Result of Mental Strain Or Emotional Disturbance (Classic Reprint) William A.

Hammond,2015-07-08 Excerpt from Cerebral Hyperemia the Result of Mental Strain or Emotional Disturbance That an increased amount of blood flows through the cerebral vessels during mental activity that these vessels may become permanently over distended and that profound interstitial changes may thereby be eventually produced in the brain substance are facts in regard to which I have no question The first two are capable of actual demonstration the last is a matter of inference but of inference so very decided in its character as scarcely to allow of the existence of a doubt What these changes are and what relation they bear to the kind and degree of cerebral action we are far from being able to determine About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Rallo,Sanjeev Sreenivasan,2023-12-08 This book is a collection of the latest data and papers on neurological disorders during pregnancy These complicated and difficult conditions require a multi disciplinary approach to treatment which may either be surgical intervention or medical management For women in the reproductive age group the diagnosis of neurological disorders during pregnancy or post partum creates further challenges Taking motivation from the Editor s successful management for pregnant cases with neurological disorders this book is intended to guide the neurosurgical community towards better management of treating neurological disorders in pregnancy *The American Catalogue ...* ,1941 Vascular Nursing - E-Book Victora A. that headaches represent an everyday problem in medical practice When the first headache clinics were established some years ago they were regarded as very progressive Today there are special outpatient centers and clinics for headache patients However this specialization has certainly not progressed very far The fact is that differential diagnosis and treatment of recurrent and chronic headaches represents a broad field that cuts across many disciplines Headaches are thus relevant not only to the neurologist but also to the psychiatrist the neuro surgeon the internist the endocrinologist the psychologist the pharmacologist and the biochemist Despite intensive research in numerous and very disparate medical disciplines there are still no generally accepted pathophysiologic concepts for many headache syndromes Realizing the importance of a multidisciplinary forum the IHS assumed the organization of this congress in collaboration with the German Migraine Society
