Central Asias New States Independence Foreign Policy And Regional Security:

The International Politics of Central Asia John Anderson, 1997 Central Asia is a fascinating region yet remote and unfamiliar to many people This new study provides and introduction to the politics of Kazakhstan Kyrgyzstan Ijakistan Turkestan and Uzbekistan Central Asia's New States Martha Brill Olcott, 1996 Reports on selected topics from recent research in minimax theory focusing on the classical theorems optimization problems using duality theory optimality and approximate algorithms Among the 18 papers are discussions of minimax trees and associated algorithms an iterative method the on line scheduling of two stage shops apportioning seats to a parliament mutually repellant sampling problems of six points and seven points in a planar convex body and the counterfeit coin problem A final paper explores minimax problems in combinatorial optimization Accessible to graduate students and researchers in optimization computer science and related disciplines No subject index Annotation copyright by Book News Inc Portland OR **Kyrgyzstan - Regime Security and Foreign Policy** Kemel Toktomushev, 2016-10-04 Kyrgyzstan is an interesting example of a relatively weak state which for its brief period of independence has already ousted two presidents experienced two revolutions survived two interethnic conflicts and yet remained intact This book explores this apparent paradox and argues that the schism between domestic and international dimensions of state and regime security is key to understanding the nature of Kyrgyz politics The book shows how the foreign policy links to the Manas Air Base used by the US military and essential for supplying their forces in Afghanistan the economic arrangements necessary for sustaining the base both inside and outside Kyrgyzstan and the myriad of different actors involved in all this combined to overshadow points of friction to ensure stable continuance of the status quo Overall the book shows how broad geopolitical forces and complex local factors together have a huge impact on the formation of Kyrgyz foreign policy **Power and Water in Central Asia** Filippo Menga, 2017-12-01 Water is an irreplaceable and transient resource which crosses political boundaries in the form of rivers lakes and groundwater aquifers The collapse of the Soviet Union in 1991 led to the birth of fifteen countries including the five Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan When the USSR ceased to exist so did the centralised Soviet resource distribution system that managed the exchange and allocation of water energy and food supplies A whole new set of international relations emerged and the newly formed Central Asian governments had to redefine the policies related to the exchange and sharing of their natural resources This book analyses the role of state power in transboundary water relations It provides an in depth study of the evolution of interstate relations in Central Asia in the field of water from 1991 2015 Taking as a case study the planned construction of the Rogun and Kambarata dams in Tajikistan and Kyrgyzstan the author examines various forms of overt and covert power shaping interstate relations and the way hegemonic and counter hegemonic measures are put in place in an international river basin He argues that the intimate correlation between the concepts of power and hegemony can offer key insights to the analysis and understanding of transboundary water relations

While the analytical focus is placed on state power the book demonstrates that hegemonic and counter hegemonic tactics represent the ways in which power is wielded and observed Offering fresh theoretical interpretations to the subjects of power and counter hegemony in the Aral Sea basin this book puts forward the original circle of hydro hegemony an analytical framework in which the various forms of power are connective in the function of hegemony It will be of interest to scholars in the field of water and environmental politics and Central Asian Studies

Central Asian Security Roy Allison, Lena Jonson, 2004-05-13 This volume is the first comprehensive scholarly analysis of the strategic reconfiguration of Central Asia as Russia has become more disengaged from the nations in the region and as these nations have developed new relations to the south east and west The international implications are enormous because of the rich energy sources oil and natural gas located in the Caspian Sea area The authors assess a variety of internal security policy challenges confronting these states for example the potential for conflict arising from such factors as a mixed ethnic population resource scarcity particularly in relation to water management and an Islamic revival They also examine the security policy content of relations between the Central Asian states and regional and international powers specifically the stakes interests and policies of Russia China Iran Turkey and the United States These internal challenges and the evolution of relations with external powers may result in new cooperative relationships but they may also lead to destabilizing rivalry and interstate enmity in Central Asia It is important to identify new patterns of relevance for future security cooperation in the region but the potential for a new security system or for new institutions to manage security in the region remains uncertain These issues are explored by a team of prominent specialists from Western Europe the United States Russia and China
