L'Auteur Marie Christine Pauwels est maître de conférences à l'université Paris X Nanterre. [Image of the Other and the Self in the American and British press during the Gulf Crisis and War](#) Ingrid Deweweire, 2024-10-15 The invasion of Kuwait by Iraqi troops on 2 August 1990 triggered a large scale military operation conducted by Washington as well as a huge media campaign. This study seeks to compare the American press with the British press during the Gulf Crisis and War. The main objective is to examine the journalistic discourse of opinion as developed by newspapers belonging to the so-called quality press and deconstruct the ways in which this discourse was developed. This raises questions about the language adopted by editorialists and journalists and in particular about the way in which the Other enemy and allies and the Self the USA and the UK were described by the American daily papers the New York Times and the Washington Post and the British daily papers the Times and the Guardian and the Sunday newspapers the Sunday Times and the Observer during the crisis and the war. The study is based on a comparative analysis of editorials opinion articles and letters to the editor published in the selected newspapers in order to highlight subjects and themes in connection with the image of the Other and the Self and show the differences and similarities in the processing of information in both the American and British press.

Reading America Matthew Guillen, 2007 Is there a unique visual infrastructure that keeps and defines a culture? Professor Guillen discusses a culture built entirely on the visual modality and most significantly on that province of the visual we negotiate through the written word. Although this work analyzes features critical to the American legal tradition from its origins in Anglo-Saxon jurisprudence to recent Supreme Court decisions substantially exploring Judge Scalia's originalist movement and Posner's law and economics theories the presiding agency remains the power of the written language to provide scaffolding to American culture. Writing it is argued contours our worldview our laws morality science social problems and affects film media broadcasting comics and literary criticism. The effects of our national formation and the literature that sprung up to discuss the new nation and define its people have directly led to the evolution of our idiosyncratic legal and philosophical perspectives. The title of this work purposely carries a double meaning since it proposes to deal with a

reading of American culture through its legal and cultural legacy as well as concluding with questions revolving around a well informed American readership essential for the preservation of the culture as well as the continued existence of a national collective conscience

The Fictions of American Capitalism Jacques-Henri Coste, Vincent Dussol, 2020-02-26 The Fictions of American Capitalism Working Fictions and the Economic Novel introduces a new way of thinking about fiction in connection with capitalism especially American capitalism These essays demonstrate how fiction fulfills a major function of the American capitalist engine presenting various formulations of American capitalism from the perspective of economists social scientists and literary critics Focusing on three narratives fictitious capital working fictions and the economic novel the volume questions whether these three types of fiction can be linked under the sign of capitalism This collection seeks to illustrate the American economy's dependence on fictitiousness America's ideological fictions and the nation's creative literary fiction In relation to what the credit and banking crisis of 2007-2008 exposed about the unreal base of the economy the volume concludes with a call to recognize the economic humanities arguing that American fiction and American literary studies can provide a useful mirror for economists

Revisiting the UK and Ireland's Transatlantic Economic Relationship with the United States in the 21st Century Anne Groutel, Marie-Christine Pauwels, Valérie Peyronel, 2016-10-25 This book revisits the economic relationship that ties the UK and Ireland to the United States in the aftermath of the greatest economic crisis of the past fifty years When considering recent developments to these economic links it appears that oppositional forces are at work On one hand globalization and the rise of new economic powers may undermine the ties Besides Ireland's and the UK's European Union membership could also loosen their economic ties with the US Conversely the future Transatlantic Trade and Investment Partnership agreement may well strengthen trade and investment links between the US and Europe Are the economic bonds between the US the UK and Ireland waning as some pundits purport Or are those claims overstated Could their economic relationship simply be going through a process of change Although there may not be a single and straightforward answer to these questions the authors seek to address these issues and provide insight into the changing dynamics of this historic economic relationship
