Citizen Watch Interactive Manual

Frank P. Harvey

Citizen Watch Interactive Manual:

The Citizen Machine Anna McCarthy, 2013-03-31 This is the untold political history of television's formative era. The author, an historian, goes behind the scenes of early television programming, revealing that producers, sponsors, and scriptwriters had far more in mind than simply entertaining and selling products. Long before the age of PBS, leaders from business, philanthropy, and social reform movements, as well as public intellectuals, were all obsessively concerned with TV's potential to mold the right kind of citizen. After World War II, inspired by the perceived threats of Soviet communism, class war, and racial violence, members of what was then known as the Establishment were drawn together by a shared conviction that television broadcasting could be a useful tool for governing. The men of Du Pont, the AFL-CIO, the Advertising Council, the Ford Foundation, the Fund for the Republic, and other organizations interested in shaping America according to American philosopher Mortimer Adler, the ideas that should be in every citizen's mind turned to TV as a tool for reaching those people they thought of as the masses. Based on years of archival work, this work sheds new light on the place of television in the postwar American political landscape. At a time when TV broadcasting is in a state of crisis and when a new political movement for media reform has ascended the political stage, here is a new history of the ideas and assumptions that have profoundly shaped not only television but our political culture itself. Bowel Disease Nursing Manual Andreas Sturm, Lydia White, 2019-01-24 This comprehensive manual discusses the many aspects of inflammatory bowel disease (IBD), providing relevant information along with practical guidance. The reader is also directed to additional resources for extra and current information. This book comes at a time when the number of people suffering from the two major forms of IBD, ulcerative colitis (UC) and Crohn's disease (CD), is rising around the globe. Despite their huge impact on daily life and health economics, these diseases are not fully understood, and diagnosis and treatment remains a significant challenge. IBD nurses are increasingly recognised as key clinicians within the multidisciplinary team caring for people with IBD. Through experience and specialist knowledge, IBD nurses provide timely support, advice, and treatment for people living with this unpredictable condition. IBD nurses are also well placed to liaise with the wider team developing patient-centred services which best fit their local health framework. The combined international expertise and accessible guidance here will equip nurses or any clinician wanting to increase their competence in IBD management. Thereby, this manual aims to contribute to the optimisation of IBD care throughout the world.
