Causes of the Cold War

The Cold War was a long period of tension between the United States and the Soviet Union that lasted from the late 1940s to the early 1990s. It was called "cold" because it did not lead to direct fighting between the two countries. Instead, the conflict was fought through threats, political pressure, and smaller wars in other parts of the world. The main cause of the Cold War was the rivalry between the United States, which supported democracy and capitalism, and the Soviet Union, which supported communism and a government-controlled economy.
