On the Subject of Values ... and the Value of Subjects: New thinking to guide schools through the curriculum Bridget Knight, 2022-12-02 Education is a values-based experience. Consciously or not, we are highly attuned to one another's values. We see time and again that the best schools are compelled and propelled by strong values which inspire and guide the creation of a meaningful context for learning and an aspirational ethos. However, values can often be submerged, overlooked or ignored. By infusing our teaching with values, both explicit and implicit, learning can serve a greater purpose, nourishing us as humans and deepening our experience. Drawing on the views and inspired teaching practice of a range of contributors, this book offers both the theoretical underpinning and practical examples to bring values to life in the classroom. It shows how each subject has a unique and valuable role and how a values-based culture generates a powerful climate for successful learning in every subject discipline. It is a bedside book that will bring joy and practical support to the many professionals who work from the heart and wish to touch the future. It offers validation to those teachers who deeply care about the subject disciplines they teach, ultimately making a difference to children, their lives, and their world. In our current educational context, this work is unashamedly people-oriented, future-thinking, and forward-facing.

EBOOK: Interactive Teaching in the Primary School Janet Moyles, Linda Hargreaves, Roger Merry, Fred Paterson, Veronica Esarte-Sarries, 2003-04-16 What is interactive teaching in primary classrooms? What do primary teachers and children do to interact effectively? Are there benefits in such interactions to both teaching and learning? A research partnership of tutors and teachers strives towards answers to these key questions. This book is the story of this intriguing and exciting research project. The authors examine the practical and theoretical aspects that are key to understanding and undertaking interactive teaching in primary classrooms. The project is unique in using its own interactive processes, Reflective Dialogues, to help teachers make sense of their own teaching. This process includes capturing and analysing classroom sessions on video, and cameos of these classroom interactions are discussed throughout the book. The research context is the Literacy Hour in Key Stages 1 and 2. This new title is key reading for academics, researchers, teacher educators, policymakers, and primary school teachers.
