IMPORTANT: Read entire instructions before programming the thermostat.

GENERAL

The commercial, programmable thermostats are wall-mounted, low-voltage thermostats which maintain room temperature by controlling the operation of an HVAC (heating, cooling and ventilation) system. Separate heating and cooling set points and auto-changeover capability allow occupied and unoccupied programming schedules for energy savings.

All thermostats allow up to 3 occupied and one unoccupied time/temperature setting to be programmed per 24-hr period. Each thermostat stores programs for 3 different days (Saturday, Sunday, and Monday through Friday). Batteries are not required. During power interruption the internal NEVERLOST™ memory stores programs for an unlimited time.
