Olick, 2016-11-24 National identity and political legitimacy always involve a delicate balance between remembering and forgetting All nations have elements in their past that they would prefer to pass over the catalog of failures injustices and horrors committed in the name of nations if fully acknowledged could create significant problems for a country trying to move on and take action in the present Yet denial and

forgetting carry costs as well Nowhere has this precarious balance been more potent or important than in the Federal Republic of Germany where the devastation and atrocities of two world wars have weighed heavily in virtually every moment and aspect of political life The Sins of the Fathers confronts that difficulty head on exploring the variety of ways that Germany's leaders since 1949 have attempted to meet this challenge with a particular focus on how those approaches have changed over time Jeffrey K Olick asserts that other nations are looking to Germany as an example of how a society can confront a dark past casting Germany as our model of difficult collective memory **Making the Modern** Terry Smith,1993 Smith reveals how this visual revolution played an instrumental role in the complex psychological social economic and technological changes that came to be known as the second industrial revolution From the role of visualization in the invention of the assembly line to office and building design to the corporate and lifestyle images that filled new magazines such as Life and Fortune he traces the extent to which the second wave of industrialization engaged the visual arts to project a new iconology of progress **Geography and Revolution** David N. Livingstone, Charles W. J. Withers, 2010-08-15 A term with myriad associations revolution is commonly understood in its intellectual historical and sociopolitical contexts Until now almost no attention has been paid to revolution and questions of geography Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations David N Livingstone and Charles W J Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions Here scientific revolutions Copernican Newtonian and Darwinian ordinarily thought of as placeless are revealed to be rooted in specific sites and spaces Technical revolutions the advent of print time keeping and photography emerge as inventions that transformed the world's order without homogenizing it Political revolutions in France England Germany and the United States are notable for their debates on the nature of political institutions and national identity Gathering insight from geographers historians and historians of science Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature shape and location of revolutions Poetry in Pieces Michelle Clayton, 2011-01-10 Set against the cultural and political backdrop of interwar Europe and the Americas Poetry in Pieces is the first major study of the Peruvian poet Cesar Vallejo 1892-1938 to appear in English in more than thirty years Vallejo lived and wrote in two distinct settings Peru and Paris which were continually crisscrossed by new developments in aesthetics politics and practices of everyday life Michelle Clayton combines close readings of Vallejo's writings with cultural historical and theoretical analysis connecting Vallejo and Latin American poetry to the broader panorama of international modernism and the avant garde and to writers and artists such as Rainer Maria Rilke James Joyce Georges Bataille and Charlie Chaplin Poetry in Pieces sheds new light on one of the key figures in twentieth century Latin American literature while exploring ways of rethinking the parameters of international lyric modernity Concepts of the World Effie Rentzou, 2022-09-15 How did the avant garde imagine its interconnected world And how does this legacy affect our

understanding of the global today The writers and artists of the French avant garde aspired to reach a global audience that would be wholly transformed by their work In this study Effie Rentzou delves deep into their depictions of the interwar world as an international and modern landscape one marked by a varied cosmopolitanism The avant garde s conceptualization of the world paralleled rejected or expanded prevailing notions of the global sphere The historical avant garde which encompassed movements like futurism Dada and surrealism was self consciously international operating across global networks and developed with the whole world as its horizon and its public In the heady period between the end of the Belle poque and the tumult of World War II both individual artists including Guillaume Apollinaire Blaise Cendrars Francis Picabia Louis Aragon Leonora Carrington and Nicolas Calas and collective endeavors such as surrealist magazines and exhibitions grappled with contemporary anxieties about economic growth imperialism and colonialism as well as various universalist cosmopolitan and internationalist visions By probing these works Concepts of the World offers an alternative narrative of globalization one that integrates the avant garde s enthusiasm for as well as resistance to the process Rentzou identifies within the avant garde a powerful political language that expressed the ambivalence of living and creating in an increasingly globalized world a language that profoundly shaped the way the world has been conceptualized and is experienced today

Do Museums Still Need Objects? Steven Conn, 2010 We live in a museum age writes Steven Conn in Do Museums Still Need Objects And indeed at the turn of the twenty first century more people are visiting museums than ever before There are now over 17 500 accredited museums in the United States averaging approximately 865 million visits a year more than two million visits a day New museums have proliferated across the cultural landscape even as older ones have undergone transformational additions from the Museum of Modern Art and the Morgan in New York to the High in Atlanta and the Getty in Los Angeles If the golden age of museum building came a century ago when the Metropolitan Museum of Art the American Museum of Natural History the Philadelphia Museum of Art the Field Museum of Natural History and others were created then it is fair to say that in the last generation we have witnessed a second golden age By closely observing the cultural intellectual and political roles that museums play in contemporary society while also delving deeply into their institutional histories historian Steven Conn demonstrates that museums are no longer seen simply as houses for collections of objects Conn ranges across a wide variety of museum types from art and anthropology to science and commercial museums asking questions about the relationship between museums and knowledge about the connection between culture and politics about the role of museums in representing non Western societies and about public institutions and the changing nature of their constituencies Elegantly written and deeply researched Do Museums Still Need Objects is essential reading for historians museum professionals and those who love to visit museums

Wireless Dada Kurt Beals, 2019-11-15 Wireless Dada Telegraphic Poetics in the Avant Garde demonstrates that the poetics of the Dada movement was profoundly influenced by the telegraph and the technological and social transformations that it brought about in the nineteenth and early twentieth

centuries While telegraphy's impact on Italian Futurism and German Expressionism is widely acknowledged its formative role in Dada poetics has been largely neglected Drawing on media history and theory avant garde studies and German literary studies Kurt Beals shows how the telegraph and the cultural discourses that surrounded it shaped the radical works of this seminal avant garde movement The nonsense strain in Dada is frequently seen as a response to the senseless violence of the First World War Beals argues that it was not just the war that turned Dada poetry into a jumble of senseless signals it was also the wireless
