Publications of the Modern Language Association of America ,1973-05-03 **Beyond Racial Capitalism** Caroline Shenaz Hossein, Sharon D. Wright Austin, Kevin Edmonds, 2023 Knowledge making in the field of alternative economies has limited the inclusion of Black and racialized people's experience In *Beyond Racial Capitalism* the goal is close that gap in development through a detailed analysis of cases in about a dozen countries where Black people live and turn to co-operatives to manage systemic exclusion Most cases focus on how people use group methodology for social finance However financing is not the sole objective for many of the Black people who engage in collective business forms it is about the collective and the making of a Black social economy Systemic racism and anti Black exclusion create an environment where pooling resources in kind and money becomes a way to cope and to resist an oppressive system This book examines co-operatives in the context of racial capitalism a concept of political scientist Cedric J Robinson's that has meaning for the African diaspora who must navigate often secretly and in groups the landmines in business and society Understanding business exclusion in the various cases enables appreciation of the civic contributions carried out by excluded racial minorities These social innovations by Black people living outside of Africa who build co-operative economies go largely unnoticed If they are noted they are demoted to an informal activity and rationalized as having limited potential to bring about social change The sheer determination of Black diaspora people to organize and build co-operatives that are explicitly anti racist and rooted in mutual aid and the collective is an important lesson in making business ethical and inclusive
