

# CISSP Study Guide

Mode 3 (CFB) – replay?

Mode 4: Output Feedback (OFB)

- Works with 8-bit (or smaller) blocks and uses a combination of stream ciphering and block ciphering, using the previous keystream with the key to create a new keystream.
- Size of the keystream value must be the same size as the plaintext block
- Less susceptible to the error type that CFB has

Mode 5: Counter Mode (CTR)

- Like OFB mode, but uses an incrementing IV counter to ensure that each block is encrypted with a unique keystream
- Ciphertext is not chaining into the encryption process
- Performance is much better than the other modes
