

FORMS OF WELD CORROSION

Weldments can experience all the classical forms of corrosion but most general forms are:

- I. Galvanic corrosion
- II. Pitting corrosion
- III. Crevice corrosion
- IV. Intergranular corrosion
- V. Stress corrosion
- VI. Hydrogen cracking
- VII. Microbiologically influenced corrosion

GALVANIC CORROSION

- Occurs when two different metals in contact are exposed to a conductive solution.
- Use of filler metal of composition different from base metal may produce an electrochemical potential difference that results in flow of current leading to corrosion of anodic areas.
- For majority of Aluminium alloys weld metal and HAZ more noble compared to base metal shown in fig(a)&(b) for a saltwater environment.
- However in certain Al alloys ,narrow anodic region formed in HAZ which is more prone to localised attack. Alloys 7005 and 7039 are particularly susceptible to this problem.fig(c)

Corrosion Of Weldments Corrosion Of Weldments:

Corrosion of Weldments Joseph R. Davis, 2006-01-01 Corrosion failures of industrial components are commonly associated with welding. The reasons are many and varied. For example, welding may reduce the resistance to corrosion and environmentally assisted cracking by altering composition and microstructure, modifying mechanical properties, introducing residual stress, and creating physical defects. This book details the many forms of weld corrosion and the methods used to minimize weld corrosion. Chapters on specific alloys: carbon and alloy steels, stainless steels, high nickel alloys, and nonferrous alloys describe both general welding characteristics and the metallurgical factors that influence corrosion behavior. Corrosion problems associated with dissimilar metal weldments are also examined. Case histories document corrosion problems unique to specific industries, including oil and gas, chemical processing, pulp and paper, and electric power. Special challenges caused by high temperature environments are discussed. Commonly used methods to monitor weld corrosion and test methods for evaluation of intergranular pitting, crevice stress corrosion cracking, and other forms of corrosion are also reviewed.

Corrosion Resistance of Welded Joints William Spraragen, Welding Research Council (U.S.), Gerard Eden Claussen, 1937 The corrosion of welded joints is dependent on a number of factors such as corrosive media, temperature, method of exposure, contact with other substances, as well as the quality of the welded joint itself.

Hot Corrosion of Weldments M. Arivarasu, 2016 Hot corrosion of the weldment is the result of the reaction between oxidation and sulfidation, which affects welded joints exposed to combustion gases containing sulfate. Coal ash at high temperature. It is also demonstrated that welding processes, weld consumables, temperature of exposure, and mixture of salt environment are important factors in hot corrosion of the weldment.

High Temperature Corrosion Zaki Ahmad, 2016-09-07 High temperature corrosion is an extremely important area of corrosion, as it causes the failure of high temperature equipment in process industry and power generation. Every engineer is required to obtain a basic knowledge of high temperature corrosion to prevent the colossal damage caused by it. This book contains chapters ranging from basic to advanced topics to create an understanding of high temperature corrosion of various metals and alloys. With the emerging technologies such as nanotechnology, their role in controlling high temperature corrosion needs to be comprehended, and new techniques developed to control high temperature corrosion. It is hoped that this book would fulfill these objectives and aspirations of the readers. Note from the publisher: It is with great sadness and regret that we inform the contributing authors and future readers of this book that the Editor Prof. Zaki Ahmad passed away shortly after finishing the book and before having a chance

to see its publication Prof Ahmad was InTech's long term collaborator and edited his first book with us in 2011 Recent Trends in Processing and Degradation of Aluminium Alloys The book High Temperature Corrosion was his fourth edited volume The fruitful collaboration continued until his final days when he was acting as a co editor on a book Wastewater Treatment and Resource Recovery We would like to acknowledge Dr Zaki Ahmad's contribution to open access scientific publishing which he made during 6 years of dedicated work on edited volumes and express our gratitude for his pleasant cooperation with us
