The Sun and the Heliosphere in Three Dimensions was held in Les Diablerets Switzerland on 4-6 June 1985 Organised almost
exactly ten years after the Goddard Space Flight Center Symposium dealing with the Sun and the interplanetary
medium in three dimensions the aim of this Symposium was not only to review the progress made in understanding the three
dimensional structure and dynamics of the heliosphere but also to look ahead to the scientific return to be expected from the
Ulysses mission Scheduled for launch in May 1986 the scientific instrumentation on board Ulysses will shed light on the
conditions and processes occurring away from the ecliptic plane thereby adding literally a new dimension to our
understanding of the only stellar plasmasphere to which we have direct access The scientific programme of the Symposium
was built around a series of invited review papers dealing with aspects of the corona and its influence on the interplanetary
medium via transient ejecta the solar wind energetic solar particles and galactic cosmic rays interplanetary dust and neutral
gas These invited talks were supplemented by a number of contributed and poster papers With the exception of three
contributed talks and Wibberenz review of coronal acceleration of energetic particles all papers presented at the Symposium
are included in this volume **Monthly Notices of the Royal Astronomical Society** Royal
