Corporate Europe How Big Business Sets Policies On Food Climate And War:

Corporate Europe David Cronin, Pluto Press, 2013 Reveals how the EU's policies on health climate change armaments and food safety have been tailored to please a corporate elite Corporate Europe David Cronin, 2013-08-12 During the chaos of the eurozone crisis few mainstream commentators have stopped to question the purpose of the European Union itself and whose interests it serves Corporate Europe goes beyond the divisions between nation states focusing instead on the division between the corporate elite and the peoples of Europe David Cronin spent a year investigating the privileged access that big business enjoys in Brussels In this book he reveals how the EU's policies on health climate change armaments and food safety have been tailored to please an unaccountable elite Making extensive use of previously unpublished documents he explores how ideologically blinkered lobbyists have seized on the financial crisis of recent years to entrench the casino capitalism that caused the crisis in the first place What emerges is a powerful exposé of how vested interests in the EU have manipulated opportunities to introduce ideologically driven reforms Unmasked Laurence Cockcroft, Anne-Christine Wegener, 2016-11-30 How corrupt is the West Europe and North America's formal self perception is one of high standards in public life And yet corruption is receiving ever greater attention in the European American and Canadian press with high profile cases affecting both the corporate and political worlds This book identifies the driving forces behind such cases particularly the role of political finance lobbying the banking system and organised crime It analyses the sectors which are particularly prone to corruption including sport defence and pharmaceuticals In the course of their investigation the authors consider why anti corruption legislation has not been more effective and why there is an increasing discrepancy between regulation and commercial and cultural practice Are Europe and the US genuinely serious about fighting corruption and if so what measures will be taken to roll it back *Convincing Political Stakeholders* Klemens Joos, 2023-10-23 In the new edition of his standard work the founder of one of the most successful lobbying companies in the European Union EU Prof Klemens Joos bundles experience acquired over more than three decades to form a scientific theory on governmental relations It focusses on the insight that in view of the increasingly complex decision making structures of the EU the most precise possible knowledge of decision makers and decision making processes is at least equally as important to success as the content aspects of interest representation In a new chapter the author sets out the formula for science based interest representation developed by him from his practical experience With the Treaty of Lisbon which entered into force on 1 December 2009 the EU de facto became a state territory stretching from Portugal to Finland and from Ireland to Cyprus The European Parliament became an equal status decision maker alongside the Council of the European Union Council The previous co decision procedure was elevated to become the standard procedure ordinary legislative procedure The so called qualified majority 55 percent of the EU member states which simultaneously represent at least 65 percent of the EU population was introduced for all important areas in the Council As a result the outcome of decision making processes has

become largely incalculable for the actors on the European Union stage the EU member states EU regions companies associations and organisations The second edition includes a new chapter in which Prof Klemens Joos makes the variables of successful interest representation even more tangible on the basis of his scientific formula at the latest since the Treaty of Lisbon the basic prerequisite for successful interest representation in the EU involves the continuous and close intermeshing of the affected party's content competence of the four classic instruments of interest representation corporate representative offices associations public affairs agencies law firms with process structure competence i.e. the EU wide maintenance of the required spatial personnel and organisational capacities as well as strong networks across institutions political groups and member states on the part of an independent intermediary The likelihood of success can be increased exponentially if success is achieved firstly in committing to the concern of an affected party through a change of perspective such that the positive effects on the common good are shifted into the foreground for the decision makers in the EU perspective change competence and secondly in successfully integrating the concern into the crucial decision making processes at the political level and continuously supporting it process support competence Guest authors This work includes guest contributions from Prof Christian Blumhuber Berlin University of the Arts Prof Anton Meyer formerly LMU Munich Prof Armin Nassehi LMU Munich and Prof Franz Waldenberger Director of the German Institute of Japanese Studies Tokyo as well as a foreword by Prof Gunther Friedl Dean of the TUM School of Management and a preface by Prof Thomas F Hofmann President of TU Munich

A Quiet Word Tamasin Cave, Andy Rowell, 2014-03-06 Q What's worth 2 000 000 000 answers to no one and operates out of public sight A Britain's influence industry The corporate takeover of democracy is no conspiracy theory it's happening and it affects every aspect of our lives the food we eat the places we live the temperature of our planet how we spend our money and how our money is spent for us And much more A Quiet Word shows just how effectively the voice of public interest is being drowned out by the word in the ear from the professional persuaders of the lobbying industry And if you've never heard about them that's because the most effective lobbying goes unnoticed A Quiet Word shines the brightest of lights into one of the darkest and least understood corners of our political culture It is essential urgent authoritative reading for anyone interested in our democracy and where this country is heading And by showing how influence is constructed it puts power back in your hands

The European Union and Supranational Political Economy Riccardo Fiorentini, Guido Montani, 2014-12-05 The financial crisis originated in 2008 in the United States had a dramatic impact on the world economy The European Union was immediately involved but its reaction to the crisis was clearly inadequate The misgovernment of the European economy not only put at risk the European Monetary Union but it also caused further hindrances to the recovery of the global economy The global financial turmoil shook deep rooted beliefs The doctrine of international neo liberalism is more and more criticized Nevertheless the critics of neo liberalism focus their attention on the relationship between the state and the market as if the nation states with their international organisations have enough

power for an effective global governance of the world economy The model of European supranational integration though seriously imperfect can suggest some new way out from the crisis even at the world level based on a new relationship between the supranational government of the Union and the market In this book several academic disciplines are involved international economics international political economy international law international relations political theory and democratic theory Adopting such a multidisciplinary theoretical perspective the volume tries to answer the following question Is a more supranational Europe able to provide a better government of the EMU Does this reform involve more European democracy

Corporate Power, Class Conflict, and the Crisis of the New Globalization Ronald W. Cox, 2019-01-14 Transnational corporations have used their market and political power in the U S the European Union and Japan to expand global production on terms that are highly favorable to corporate interests Through a detailed history of the establishment of global value chains Ronald W Cox examines how corporations have internationalized production by working directly with political elites to establish terms of investment and trade that facilitate working class exploitation He also examines the political implications of the growing gap between the global rich and the working class including the increasing illegitimacy of corporate backed governments in the United States and the European Union The author concludes the book with suggestions for how the global working class can fight for their own interests in the context of the rising threats of far right extremism and neo fascist political movements

Responsible Leadership Steve Kempster, Brigid Carroll, 2016-03-31 It is time for the development of a new kind of business leadership Global needs call for a revision of market capitalism and a move towards moral capitalism a move from value to values from shareholders to stakeholders and from balance sheets to balanced development Kofi Annan With the challenge of this transition in mind this book argues that it is time for a new understanding of leadership a new romanticism which looks behind the overvalued heroic leadership notion The editors explore a romanticized rhetoric and situate it within current discourses of authentic distributed and ethical leadership where societal economic and environmental challenges require us to take a collective lead towards doing good and growing well Exploring this dichotomy of romantic ideal and essential requirement this book combines the insights of leading academics and with those of practitioners in the field Thought provoking and engaging it will challenge both thinking and practice and is essential reading for all those operating or researching in the field of leadership particularly those who realize the overwhelming challenges of sustainability and corporate social responsibility which the world now faces

Solidarity Beyond Borders Janusz Salamon, 2015-09-24 Solidarity Beyond Borders is a collection on international ethics by a multidisciplinary team of scholars from four continents The volume explores ethical and political dimensions of transnational solidarity in the emerging multipolar world Analyzing global challenges of the world plagued by poverty diseases injustice inequality and environmental degradation the contributors rooted in diverse cultures and ethical traditions voice their support for solidarity beyond borders Bringing to light both universally shared ethical insights as well as the irreducible

diversity of ethical perceptions of particular problems helps the reader to appreciate the chances and the challenges that the global community more interconnected and yet more ideologically fragmented than ever before faces in the coming decades. *Solidarity Beyond Borders* exemplifies an innovative approach to the key issues of global ethics which takes into account the processes of economic globalization leading to an ever deeper interdependence of peoples and states as well as the increasing cultural and ideological fragmentation which characterize the emerging multipolar world order. *The Poverty of Capitalism* John Hilary, 2013-10-09 Capitalist growth is widely heralded as the only answer to the crisis still sweeping the global economy. Yet the era of corporate globalisation has been defined by unprecedented levels of inequality and environmental degradation. A return to capitalist growth threatens to exacerbate these problems, not solve them. In *The Poverty of Capitalism* John Hilary reveals the true face of transnational capital in its insatiable drive for expansion and accumulation. He exposes the myth of corporate social responsibility (CSR) and highlights key areas of conflict over natural resources, labour rights and food sovereignty. Hilary also describes the growing popular resistance to corporate power as well as the new social movements seeking to develop alternatives to capitalism itself. This book will be essential reading for all those concerned with global justice, human rights and equity in the world order.
