concepts by using colours and visualisations in a clear and intuitive manner The Deconstruction of Equity Wolf-Georg Ringe, 2016-05-27 New investment techniques and new types of shareholder activists are shaking up the traditional ways of equity investment that informs much of our present day corporate law and governance Savvy investors such as hedge funds are using financial derivatives securities lending transactions and related concepts to decouple the financial risk from shares This leads to a distortion of incentives and has potentially severe consequences for the functioning of corporate governance and of capital markets overall Taking stock of the different decoupling strategies that have become known over the past several years this book then provides an evaluation of each from a legal and an economic perspective Based on several analytical frameworks the author identifies the elements of equity deconstruction and demonstrates the consequences for shareholders outside investors and capital markets On this basis the book makes the case for regulatory intervention based on three different pillars and comprising disclosure voting right suspension and ex post litigation The book concludes by developing a concrete comprehensive proposal on how to address the regulatory problem Overall this book contributes to the debate about activist investment and the role of shareholders in corporate governance At the same time it raises a number of important considerations about the role of equity investment more generally **Corporate Restructuring Law in Flux** Jennifer Payne, Kristin van Zwieten, 2025-08-21 This book analyses recent developments in English corporate restructuring law from a range of comparative and theoretical perspectives exploring some of the most difficult aspects of the design of domestic restructuring laws and their application in cross border cases Recent reforms to English law took place against the backdrop of corporate restructuring law reform initiatives in Europe and in many other regions of the world These reforms reflect an emerging consensus as to the importance of such laws both as a complement to macroeconomic stabilisation tools in times of extraordinary crisis and as a determinant of investment conditions in more ordinary times But it is one thing to recognise the importance of such laws in the abstract and quite another to work out precisely how corporate restructuring rules should be designed This book explores some of the most complex aspects of designing such rules It does so primarily through the close analysis of the changes made by the enactment of the Corporate Insolvency and Governance Act 2020 UK and the interpretation of the new statutory provisions by the courts although chapter authors draw extensively on examples from other jurisdictions to critically analyse choices made in the UK and in some cases offer separate evaluation of restructuring law reform processes outside the UK including in select jurisdictions in the EU and in Africa and in the US By drawing on experiences in other jurisdictions and on insights from theory the book casts new light on recent developments in English law suggesting many avenues for further research and a range of implications for policymakers These implications are brought out in an introductory chapter by the editors introducing the landmark 2020 reforms This chapter provides a detailed synopsis of each chapter of the book drawing out connections between them and articulates some themes that run through the chapters that are salient for policymakers **The Law of Security and Title-Based Financing** Michael

Bridge, Louise Gullifer, Eva Lomnicka, 2024-10-23 Personal property security is an important subject in commercial practice as it is the key to much of the law of banking and sale. This book examines traditional methods of securing debts such as mortgages, charges and pledges as well as so-called quasi-security on property other than land, describing how these are created, how they must be registered or otherwise perfected if they are to be valid, the rights and duties of the parties and how the security is enforced if the debt is not paid. This fourth edition has been updated to incorporate recent political and legal developments including Brexit, the Edinburgh Reforms which have followed the United Kingdom's exit from the European Union, and the promise of a thorough overhaul of the consumer credit regime. The Retained EU Law (Revocation and Reform) Act 2023 potentially affects the interpretation of EU-assimilated law, including the Financial Collateral Arrangements (No. 2) Regulations (FCARs). This edition further assesses the implications of the Business Contract Terms (Assignment of Receivables) Regulations 2018, taking pledges over electronic documents of title in the light of the Electronic Trade Documents Act 2023, the outlawing of *ipso facto* clauses by the Corporate Insolvency and Governance Act 2020, and the reduced scope of the EU Insolvency Regulation. The treatment of insolvency matters within the framework of the Cape Town Convention is also considered, as are recent cases on pledges of bills of lading when the carrier no longer has possession of the goods, the distinction between fixed and floating charges, equitable liens and the right of appropriation of financial collateral. There is a full discussion of the taking of security over digital assets and the relevance of the FCARs. The only full-length treatment covering both traditional security over personal property and also devices that fulfil a similar economic function, such as retention of title and sales of receivables, *The Law of Security and Title-Based Financing* is a frequently cited and indispensable reference work both for practitioners and academics.
