Crystal Report Dynamic Columns

Brian Bischof

Crystal Report Dynamic Columns:

Crystal Reports .NET Programming Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a .NET application I've been working with Crystal Reports since Visual Basic 3 and it's always been difficult to find technical information on report writing I spent a year and a half researching what .NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of .NET programmers using Crystal Reports The first type of programmer doesn't have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP .NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB .NET and C# to show you how to modify reports manipulate different data sources XML ADO .NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate .NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected **Pro Dynamic .NET 4.0**

Applications Carl Ganz, 2010-03-26 As a developer you are likely painfully aware that not all features of an application can be anticipated when the software ships In order to cope with these eventualities and save yourself time and perhaps money it makes sense to write your applications in such a way that end users can be made as independent of the developers as possible Giving your users the power to make changes to the way the application operates once it has shipped gives them more control over the way the application works while reducing the frequency with which you need to redistribute application files creating a win-win situation *Pro Dynamic .NET 4.0 Applications* explains how to give users the power to create additional data entry fields validation logic and new reports without assistance from the application developer You will learn how to do this for both desktop C# and WPF and web ASP applications [Crystal Reports XI Official Guide](#) Neil FitzGerald, et al., 2006-11-01 The authorized guide to the latest edition of the #1 business intelligence software product Crystal
