Topic 3.2 - Cultural Landscapes AP Human Geography

Part 1: Text Analysis

No two places are the same - people will represent who they are - and what they value - based on how they shape the use of space. The **cultural landscape** is the imprint humans place on their environment and is the combination of human activities. Each culture creates a distinctive cultural landscape based on how they shape the use of space to reflect their culture. These landscapes are the combinations of physical features, agricultural and industrial practices, religious and language characteristics, and other expressions of culture like architecture and sequent occupancy. **Sequent occupancy** is the combination of different cultural imprints on space over time.
