Debt Updated And Expanded The First 5000 Years:

Debt David Graeber, 2014-12-09 Now in paperback the updated and expanded edition David Graeber's fresh fascinating thought provoking and exceedingly timely Financial Times history of debt Here anthropologist David Graeber presents a stunning reversal of conventional wisdom he shows that before there was money there was debt For more than 5 000 years since the beginnings of the first agrarian empires humans have used elaborate credit systems to buy and sell goods that is long before the invention of coins or cash It is in this era Graeber argues that we also first encounter a society divided into debtors and creditors Graeber shows that arguments about debt and debt forgiveness have been at the center of political debates from Italy to China as well as sparking innumerable insurrections He also brilliantly demonstrates that the language of the ancient works of law and religion words like guilt sin and redemption derive in large part from ancient debates about debt and shape even our most basic ideas of right and wrong We are still fighting these battles today without knowing it

Debt David Graeber, 2012 Economic history states that money replaced a bartering system yet there isn't any evidence to support this axiom Anthropologist Graeber presents a stunning reversal of this conventional wisdom For more than 5000 years humans have used elaborate credit systems to buy and sell goods Since the beginning of the agrarian empires humans have been divided into debtors and creditors Through time virtual credit money was replaced by gold and the system as a whole went into decline This fascinating history is told for the first time

Beyond Capital David Hakken, Maurizio Teli, Barbara Andrews, 2015-10-23 The financial social cataclysm beginning in 2007 ended notions of a great moderation and the view that capitalism had overcome its systemic tendencies to crisis The subsequent failure of contemporary social formations to address the causes of the crisis gives renewed impetus to better analysis in aid of the search for a better future This book contributes to this search by reviving a broad discussion of what we humans might want a post capitalist future to be like It argues for a comparative anthropological critique of capital notions of value thereby initiating the search for a new set of values as well as identifying a number of selected computing practices that might evoke new values It articulates a suggestive set of institutions that could support these new values and formulates a group of measurement practices usable for evaluating the proposed institutions The book is grounded in contemporary social science political theory and critical theory It aims to leverage the possibility of alternative futures implied by some computing practices while avoiding hype and technological determinism and uses these computing practices to explicate one possible way to think about the future

Democracy Peter Wilkin,2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its

incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO
