Contesting Earth's Future Contesting Earth's Future:

Contesting Earth's Future Michael E. Zimmerman, 2023-11-15 Radical ecology typically brings to mind media images of ecological activists standing before loggers saws staging anti nuclear marches and confronting polluters on the high seas Yet for more than twenty years the activities of organizations such as the Greens and Earth First have been influenced by a diverse less publicized group of radical ecological philosophers It is their work the philosophical underpinnings of the radical ecological movement that is the subject of *Contesting Earth's Future* The book offers a much needed balanced appraisal of radical ecology's principles goals and limitations Michael Zimmerman critically examines the movement's three major branches deep ecology social ecology and ecofeminism He also situates radical ecology within the complex cultural and political terrain of the late twentieth century showing its relation to Martin Heidegger's anti technological thought 1960s counterculturalism and contemporary theories of poststructuralism and postmodernity An early and influential ecological thinker Zimmerman is uniquely qualified to provide a broad overview of radical environmentalism and delineate its various schools of thought He clearly describes their defining arguments and internecine disputes among them the charge that deep ecology is an anti modern proto fascist ideology Reflecting both the movement's promise and its dangers this book is essential reading for all those concerned with the worldwide ecological crisis Radical ecology typically brings to mind media images of ecological activists standing before loggers saws staging anti nuclear marches and confronting polluters on the high seas Yet for more than twenty years the activities of organizations such as

Unity Of Nature, The: Wholeness And Disintegration In Ecology And Science Alan Marshall, 2002-10-04 The idea behind *The Unity of Nature* is a strong theoretical theme in a number of scientific and environmental fields from ecosystems ecology through quantum physics to environmental philosophy and ecopolitics giving rise to an inspiring optimistic socially responsive and environment friendly worldview The fields of science and environmentalism have inherited this theme of natural unity through an intellectual lineage that encompasses many non scientific and non environmental fields such as sociology theology and political philosophy Many of these fields have used natural unity in a way which is in stark opposition to the metaphysical and political desires of those who promulgate the unity of nature for progressive social change This book discusses how this has transpired and examines the social and intellectual processes that have been at work These include the social construction of the Organicism versus Mechanicism debate in ecology the intellectual links between neo classical economic principles and the New Sciences the techno scientific background of Gaia theory and the social conservatism of ecological functionalism

The World Turned Upside Down Melanie Phillips, 2011-12-13 In what we tell ourselves is an age of reason we are behaving increasingly irrationally An astonishing number of people subscribe to celebrity endorsed cults Mayan armageddon prophecies scientism and other varieties of new age anti enlightenment philosophies Millions more advance popular conspiracy theories AIDS was created in a CIA laboratory Princess Diana was assassinated and the 9 11 attacks were an

inside job In *The World Turned Upside Down* Melanie Phillips explains that the basic cause of this explosion of irrationality is the slow but steady marginalization of religion We tell ourselves that faith and reason are incompatible but the opposite is the case It was Christianity and the Hebrew Bible Phillips asserts that gave us our concepts of reason progress and an orderly world on which science and modernity are based Without its religious traditions the West has drifted into mass derangement where truth and lies right and wrong victim and aggressor are all turned upside down Scientists skeptical of global warming are hounded from their posts Israel is demonized and the US is vilified over the war on terror all on the basis of blatant falsehoods and obscene propaganda Worst of all asserts Phillips this abandonment of rationality leaves the West vulnerable to its legitimate threats Faced with the very real challenges of spiraling demographics and violent confrontational Islamism the West is no longer willing or able to defend the modernity and rationalism that it once brought into being

Contesting World Order? Joe Wills, 2017-04-13 Global and domestic policies and the rapid processes of economic globalisation have led to burgeoning levels of inequality Drawing upon insights from critical international relations theory this book explores how global justice movements use socioeconomic rights to challenge neo liberal global governance

Creation-Crisis Preaching Leah D. Schade, 2015-09-01 How can we proclaim justice for God's Creation in the face of global warming How does fracking fit with the earth and its fullness are the Lord's Creation Crisis Preaching works with the premise that all of Creation including humankind needs to hear the Good News of Jesus resurrection in this age in which humanity is crucifying Creation Informed by years of experience as an environmental activist and minister Leah Schade equips preachers to interpret the Bible through a green lens become rooted in environmental theology and learn how to understand their preaching context in terms of the particular political cultural and biotic setting of their congregation Creation Crisis Preaching provides both theoretical grounding and practical tips for preachers to create environmental sermons that are relevant courageous creative pastoral and inspiring

Perfecting Human Futures J. Benjamin Hurlbut, Hava Tirosh-Samuelson, 2016-02-22 Humans have always imagined better futures From the desire to overcome death to the aspiration to dominion over the world imaginations of the technological future reveal the commitments values and norms of those who construct them Today the human future is thrown into question by emerging technologies that promise radical control over human life and elicit corollary imaginations of human perfectibility This interdisciplinary volume assembles scholars of science and technology studies sociology philosophy theology ethics and history to examine imaginations of technological progress that promises to transcend the constraints of human body and being Attending in particular to transhumanist and posthumanist visions the volume breaks new ground by exploring their utopian and eschatological dimensions and situating them within a broader context of ideas institutions and practices of innovation The volume invites specialists and general readers to explore the stakes of contemporary imaginations of technological innovation as a source of progress a force of social and historical transformation and as the defining essence of human life

Economic Futures Ruth Irwin,2024-10-02 The life of our planet has reached a critical stage Its survival depends on our ability to rethink our relationship with ecology and create a new economy which does not rely on economic growth and supports care and sustainability for our planet This book examines histories of alternative economic theories to advocate for different ways of economic distribution that do not keep producing emissions It calls into question our philosophy of time our relationship with ecology and the original creation of debt interest and ways of avoiding exponential economic growth The author uses ideas from Maori philosophy Mesopotamian finance and quantum mechanics to set out a new basis for economic theory which is no longer set up on greedy individualism or a hierarchical trickle down effect or even overall economic growth Instead this new materialist philosophy emphasises the integration of humanity and the ecosystem and sets out to create a philosophy of economics built on interconnection and care

After the Anthropocene Anne Fremaux,2019-03-25 The environmental crisis is the most prominent challenge humanity has ever had to battle with and humanity is currently failing The Anthropocene or so called age of humans is indeed a period when the survival of humanity has never been so much at risk This book locates itself in the field of critical green political theory Fremaux s analysis of the current environmental crisis calls for us to embrace radical shifts in our modes of being or in other words socially progressive innovations that will be described within the unique framework of Green Republicanism In offering a constructive and emancipatory delineation of what could be considered an ecological civilization that is respectful of its natural environment and social differences this book describes how to shift from an arrogant speciesism and materialistic lifestyle to a post anthropocentric ecological humanism focusing on the good life within ecological limits This new political regime calls for a radical reinvention of our societies a decentering of the humans within our metaphysical worldview and a withdrawal of the capitalist technosphere at the benefit of the biosphere It will require a new economic paradigm that replaces the unsustainable capitalist logic of growth by sustainable degrowth and steady economics Rooted in ethical thinking and political philosophy this book seeks to offer a concrete roadmap of how sustainable societies can be fostered

Future in a Contested Time Regime Florentine Schoog,2025-09-28 The future is up for debate not only but particularly in light of climate change The catastrophic outlook stands in stark contrast to the optimism of progress rooted in Western modernity Thus it is not just the prospect but the concept of future itself that must be rethought This book explores modern society s relationship to the future in view of climate change Through a narratological discourse analysis it provides an overview of how climate change has been narrated in 21st century climate documentary films with particular attention to their final sequences and the prospects they articulate The study traces how these cinematic anticipations can be read as expressions of a contested time regime and derives novel figurations of future that mirror or confront the ideological conditions of the present

An Ecology of Communication William Homestead,2021-04-20 An Ecology of Communication addresses an ecological and communicative dilemma the universe earth and socio cultural life world are resoundingly dialogic yet we have created

modern and postmodern cultures largely governed by monologue This book is indispensable reading for scholars and students of communication ecology and social sciences as it moves readers beyond the anthropocentric bias of communication study toward a listening based model of communication an essential move for discerning fitting responses and the call to responsibility in an age of ecocrisis
