

TEACH COMMON CORE STANDARDS WITH THE EEI CURRICULUM

Crossed with your needs in mind, this document shows the correlation between the EEI Curriculum and the California Common Core State Standards. By teaching the EEI unit located in your classroom, you will be simultaneously addressing the Common Core standards identified in this guide.

6.6.a.—Energy: It's Not All the Same to You!

In this unit, students learn about the eight energy sources, each with its own costs and benefits. This unit engages students with in-depth examination of these varied energy sources. They learn that conversion is a necessary step in the energy use process. In conducting a cost/benefit analysis, students learn to consider not only the byproducts involved in extracting, tapping, and harnessing the natural energy resources, but also the byproducts created in the conversions necessary to produce useful energy—electricity—from these natural energy resources.
