Pre-Descemet's Endothelial Keratoplasty (PDEK) Amar Agarwal, 2018-02-28 Corneal transplantation is a widely practised surgical procedure Lamellar techniques are favoured replacing penetrating keratoplasty PK Endothelial keratoplasty EK has been adapted as an alternative in the treatment of corneal endothelial disorders whereby Descemet's membrane and the endothelium are replaced Pre Descemet's endothelial keratoplasty PDEK is the latest surgical technique for corneal transplantation This book is a step by step guide to PDEK for practising ophthalmologists Divided into five sections the text begins with the basics explaining corneal anatomy pre operative assessment general techniques in keratoplasty and the principles of PDEK The following chapters discuss surgical techniques special situations and complications and results The text covers numerous clinical scenarios and concludes with a section on miscellaneous topics such as OCT guided PDEK eye bank preparation and cosmetic iris implant complications The text is further enhanced by surgical photographs and includes an interactive DVD ROM demonstrating PDEK techniques Key points Step by step guide to Pre Descemet's endothelial keratoplasty PDEK Explains surgical techniques for numerous clinical scenarios Includes miscellaneous topics such as OCT guided PDEK and cosmetic iris implant complications Accompanying DVD ROM demonstrates PDEK techniques Descemet's Stripping Automated Endothelial Keratoplasty: Different Strokes Dermot

Cassidy,2013-03-31 Descemet's Stripping Automated Endothelial Keratoplasty DSAEK is the current preferred technique of Endothelial Keratoplasty and involves replacing only the inner endothelial cell layer rather than the whole thickness of the cornea as happens in a conventional full thickness graft. Chad Rostron, co.uk This reference is a guide to the technique of DSAEK. Beginning with an introduction to the procedure and pre-operative evaluation, the following chapters discuss in detail different surgical techniques including pre-operative preparation, anaesthesia, the procedure, post-operative follow-up and complications. Authored by recognised specialists in Australia, Hong Kong and India, this comprehensive manual includes more than 230 full colour illustrations and radiographic images as well as a DVD demonstrating surgical techniques. Key points: Comprehensive guide to technique of DSAEK. Features more than 230 full colour illustrations and radiographic images. Includes DVD demonstrating surgical techniques.

Endothelial Keratoplasty Amar Agarwal, Terry Kim, 2016-11-15. State of the art book provides hands on guidance on the latest endothelial keratoplasty techniques. A significant number of eye disorders result from deficiencies in the endothelial layer of the cornea. Endothelial keratoplasty (EK) helps spare patients from months of refractive adjustments, lengthy recovery, complications and poor outcomes associated with full thickness penetrating keratoplasty. This newer methodology is based on more selective transplantation of cells and is less invasive, resulting in quicker recovery and more efficacious outcomes. Contributors are world renowned pioneers who are front and center in implementing innovative sight restoring techniques that continue to change the ophthalmic surgery landscape. In the first section a solid foundation is laid with discussion of anatomy, the history of EK, clinical aspects of endothelial cell dysfunction and clinico pathology. Subsequent sections cover surgical procedures, special topics, surgical outcomes, complications and future trends. Readers will gain invaluable insights from clinical pearls throughout the book gleaned from hands on experience by leading experts in the field of ocular surgery. Key Features: A large compendium of high quality videos demonstrate cutting edge approaches. Richly illustrated with 400 images that further delineate anatomy and techniques. Anterior segment surgery advances including Descemet's stripping endothelial keratoplasty, DSEK, preDescemet's endothelial keratoplasty, PDEK, ultrathin DSEK, Descemet's membrane endothelial keratoplasty, DMEK and trocar anterior chamber maintainer. Treatment of conditions such as pseudophakic bullous keratopathy and Fuchs dystrophy. Management of complicated cases including glued IOL cataract extraction, IOL implantation, glaucoma, failed grafts and scarred corneas. This book is a stellar resource on the surgical management of patients with corneal disease. It will benefit both trainees and practicing ophthalmologists and is a must have for specialists who perform corneal surgery.

Corneal Transplantation Jesper Hjortdal, 2015-11-06. This textbook reviews the novel techniques employed in corneal transplantation. It will assist fellows and corneal surgeons in using these techniques to best effect and in selecting patients for surgical procedures taking into account the benefits and risks. Until 15 years ago the state of the art type of corneal transplantation was penetrating keratoplasty. Since the start of this millennium, however, important advances have been made in developing new surgical

techniques Today the vast majority of keratoplasty procedures are performed as delicate lamellar procedures either with the assistance of fine microkeratomes or femtosecond lasers or using very advanced surgical dissection procedures Corneal Transplantation provides detailed information on these and other advances which have helped patients undergoing keratoplasty to achieve a much faster visual recovery and a more stable eye with less risk of rejection episodes **Current Treatment Options for Fuchs Endothelial Dystrophy** Claus Cursiefen, Albert S. Jun, 2016-10-31 This book provides state of the art information on modern minimally invasive lamellar transplant techniques for Fuchs endothelial dystrophy FED such as Descemet stripping automated endothelial keratoplasty DSAEK and Descemet membrane endothelial keratoplasty DMEK In addition to clear step by step descriptions of procedures guidance is offered on donor tissue preparation potential intra and postoperative complications and complication management Future treatment options in the form of medical cell based approaches are also discussed To complete the picture relevant information is included on the pathophysiology clinical features and differential diagnosis of FED This book will be of interest to all who wish to learn about the dramatic developments in corneal transplantation and medical treatment that are transforming the management of FED
