A photograph of a classic 1959 Cadillac convertible, painted in a two-tone red and white color scheme. The car is parked on a gravel surface, angled towards the right. In the background, there is a green field, a white wooden fence, and distant hills under a cloudy sky.

Detroiters can better understand the people places and events that helped shape our lives 100 Years of the Detroit Historical Society written by senior curator Joel Stone captures in words and photographs the little known story of the people who have been telling Detroit s stories and preserving its material culture for the last century 100 Years of the Detroit Historical Society leads in a chronological manner through four distinct phases each with its own successes and failures with a nod to the future direction of the DHS Stone begins by laying a foundation of the city s history and describing the era that prompted the organization s founding first intended as support for the Burton Historical Collection then as stewards of a growing artifact collection in a cabinet of curiosities DHS became the primary support organization for a new municipally owned and managed historical department resulting in multiple facilities and storytelling capabilities Later changing social and fiscal priorities prompted the DHS and its partners to adopt new strategies for interpretation funding outreach and inclusion Eventually the DHS would assume stewardship of the Detroit Historical Museum and Dossin Great Lakes Museum bringing new momentum to regional public history It is important to note the truism that historical museums and archives can be poor caretakers of their own history The DHS s history was intertwined with a municipal department for so long that they actually have two histories that are only roughly preserved Research for this volume has woven many disparate details into a cogent tapestry that is easily digested by museum professionals and visitors alike It is a fascinating tale that reflects the pride Detroiters have in their city and shows trends in historical preservation and organizational structures across North America

Too Good To Fail Clifford M. Gross,2013-05-15 Too Good to Fail Creating Marketplace Value form the World s Brightest Minds is a guide for senior managers seeking to address their need to rapidly develop globally innovative products with constrained R D budgets It creates a practical strategy to address and bring together for the first time the emergence of open innovation networks intellectual property technology transfer and the ubiquitous compression of technology development time lines in a clear connected and lucid manner In the industry today companies look to remain competitive in the face of the convergence of global innovation networks and sub optimal equity markets This book offers a new perspective turning what was once perceived as a weakness into a strength Drastic action is required to address the inability of companies to control the development of new technology It requires relinquishing the illusion of control over new technology development and embracing crowdsourcing discoveries from the world s leading research institutions to exogenously replace the R of corporate R D The synthesis of the literatures on open innovation and technology transfer should prove useful to the growing number of practitioners in technology transfer The recent global emergence of Patent Box tax relief has for the first time created the financial incentives for firms to seek to create marketplace value from university intellectual capital to improve both their competitiveness and after tax income
