Chinese Childrens S Childrens Collection:

Children's Literature in China: From Lu Xun to Mao Zedong Mary Ann Farquhar, 2015-04-22 This book introduces the major works and debates in Chinese children's literature within the framework of China's revolution and modernization. It demonstrates that the guiding rationale in children's literature was the political importance of children as the nation's future.

Chinese Children's Reading Acquisition Wenling Li, Janet S. Gaffney, J. Packard, 2012-12-06 Published research and conference presentations on the Chinese language in the last decade have tended to focus on adult language processing. This book provides a comprehensive resource for the critical discussion of major issues in learning to read Chinese from a child acquisition perspective. The combined contributions from researchers in Asian studies, linguistics, psycholinguistics, psychology, cognitive psychology, reading, and education inform international comparative studies of literacy by making apparent the features of the Chinese culture, language, writing system, and pedagogy that may facilitate or impede the acquisition of literacy.

Children's Lit in China, A history of children's literature in China set in the framework of China's revolution and modernization. Lu Xun and his brother Zhou Zhuren were the founding fathers of the idea of the political importance of children and how that connected with literature tailored for them in the 20s and 30s.

Representing Children in Chinese and U.S. Children's Literature Claudia Nelson, Rebecca Morris, 2016-04-08 Bringing together children's literature scholars from China and the United States, this collection provides an introduction to the scope and goals of a field characterized by active but also distinctive scholarship in two countries with very different rhetorical traditions. The volume's five sections highlight the differences between and overlapping concerns of Chinese and American scholars as they examine children's literature with respect to cultural metaphors and motifs, historical movements, authorship, didacticism, important themes, and the current status of and future directions for literature and criticism. Wide-ranging and admirably ambitious in its encouragement of communication between scholars from two major nations, *Representing Children in Chinese and U.S. Children's Literature* serves as a model for examining how and why children's literature more than many literary forms circulates internationally.

(Re)imagining the World Yan Wu, Kerry Mallan, Roderick McGillis, 2013-06-18 *Reimagining the world* Children's Literature's Response to Changing Times considers how writers of fiction for children imagine the world not one universal world but different worlds, imaginary, strange, familiar, even monstrous worlds. The chapters in this collection discuss how fiction for children engages with some of the changes brought about by new technologies, information literacy, consumerism, migration, politics, different family structures, cosmopolitanism, new and old monsters. They also invite us to think about how memory shapes our understanding of the past and how fiction engages our emotions, our capacity to empathise, and our desire to discover and what the future may hold. The contributors bring different perspectives from education, postcolonial studies, literary criticism, cultural studies, childhood studies, postmodernism, and the social sciences. With a wide coverage of texts from different countries and scholarly and lively discussions, this collection is

itself a testament to the power of the human imagination and the significance of children's literature in the education of young people

Children's Self-determination in the Context of Early Childhood Education and Services Federico Farini, Angela Scollan, 2019-06-26 This book investigates the position of young children's self determination within a range of social contexts such as education social care mass media health politics law and the family It brings to the fore the voices of the children in the present with their interests agendas and rights Based on original primary research the chapters tackle hegemonic discourses on children's self determination as well as current policies and practices They address a broad range of topics from the planning of role play to national policies from the use of digital technologies for pedagogy to children's health and well being and from democratic practices in the classroom to the preservation of traditional family values The book presents case studies to unravel how childhood and young children's self determination are constructed at the intersection with intergenerational relationships Coming from different disciplines and using a diverse range of methodological traditions the contributions in the volume eventually converge to generate a rich complex and multi layered analysis of contemporary cultures of childhood and young children's rights
