Complexity Difference And Identity An Ethical Perspective Issues In Business Ethics:

Complexity, Difference and Identity Paul Cilliers, Rika Preiser, 2010-06-29 Complexity has been part of the academic discourse for a decade or two. Texts on Complexity fall mainly in two categories: fairly technical and mathematical on the one hand and fairly broad, vague and general on the other. Paul Cilliers' book *Complexity and Postmodernism: Understanding Complex Systems* (Routledge, 1998) constituted an attempt to bridge this divide by reflecting more rigorously on the philosophical implications of complexity and by making it accessible to the social sciences. This edited volume is a continuation of this project with specific reference to the ethical implications of acknowledging complexity. These issues are pertinent to our understanding of organisations and institutions and could contribute significantly to the development of a richer understanding of ethics in business and would be a useful tool for teachers, researchers and postgraduate students with ethical concerns in disciplines ranging from Philosophy, Applied Ethics, Sociology, Organisational Studies, Political Science, Anthropology and Cultural Studies. The central theme which binds all the contributions together is the inevitability of normative and ethical issues when dealing with complex phenomena. The book should thus be useful in the development of Business Ethics on two levels: in the first place, on the level of developing a strong theoretical foundation; in the second place, in providing specific examples of this theory in action in the real world.

A Ricoeurian Analysis of Identity Formation in Philippians Scott Ying Lam Yip, 2023-06-01 Winner of the Outstanding Theological Research Book Award 2024. Scott Ying Lam Yip presents the first specialized narrative study devoted to the identity formation processes in Philippians based on Paul Ricoeur's narrative theory. Yip demonstrates that the Christian identity of the Philippian community is shaped amidst competing narratives with divergent comprehensions and suggests that it is within an intra-Jewish contestation of testimonies that Paul updates his understanding of God and contends with a group of Jewish-Christian leaders regarding the meaning of his suffering. Yip argues that Paul faces a double contestation of narrative in which both the political authorities and a group of Jewish-Christian leaders see his imprisonment as futile and unnecessary, alerting him to an emerging crisis in which the Philippian community's conviction in suffering with him has begun to decline. It is thus essential for Paul to synthesise and install a new paradigmatic story of Christ so that his suffering can be discerned as the defining mark of God's renewed manifestation in an era of Christ's eschatological Lordship. Yip explores the means by which Paul, in a contestation of authority for the re-appropriation of God's past work, contrasts the future-oriented temporality of his testimony with the past-oriented one of the Jewish-Christian leaders. He concludes that Paul affirms the value of his present suffering in truthfulness and installs his testimony to be the exemplary story for the Philippian community.

A Multilingual Development Framework for Young Learners Barbara Hofer, 2023-03-06 This book presents a new extended framework for the study of early multicompetence. It proposes a concept of multilingual competences as a valuable educational target and a view of the multilingual learner as a competent language user. The thematic focus is on multilingual skill development in primary

schoolers in the trilingual province of South Tyrol northern Italy A wide range of topics pertaining to multicompetence building and the special affordances of multilingual pedagogy are explored Key concepts like language proficiency native speakerism or monolingual classroom bias are subjected to critical analysis The Dao of Complexity Jean

Boulton,2024-09-23 The pandemic climate change rising populism geo political unrest just a few of the issues causing turbulence in today s world We are living and working in times that are complex and fast changing The Dao of Complexity is a book about challenging and deepening worldviews It explores the remarkable resonance between complexity and Daoism engaging with the processual contextual and emergent nature both of ourselves and of the world of which we are a part It connects to ideas from such diverse fields as quantum physics brain science political theory and economics Jean asks what making sense of the world means in these turbulent times and how that can galvanise action for those of us trying to make a difference trying to make waves in a world of increasing connectivity polarisation and fragility Taking its lead from Daoist texts the design encourages readers to open at any page and use the short stand alone yet networked pieces as reflective starting points This book will be of interest to scholars and those striving for social change as well as managers and policy makers looking for inspiration The general reader interested in science philosophy and ancient wisdom will find relatable material to explore how to engage effectively in this complex world *On the (Im)Possibility of Business Ethics* Minka

Woermann,2012-11-02 Corporations and the environments in which they operate are complex with changing multiple dimensions and an inherent capacity to evolve qualitatively A central premise of this study is that a postmodern reading of ethics represents an expression of and an engagement with the ethical complexities that define the business landscape In particular the deconstructive philosophy of Jacques Derrida offers a non trivial reading of a complex notion of ethics and thereby helps us to develop the skills necessary to critique and intervene in our practices and to develop robust strategies for living in the absence of prescriptive ethical frameworks Although a central premise of this study is that substantive ethical claims can only be generated within a given context the study nevertheless presents readers with a meta position that illustrates the type of considerations that should inform ethical reflection from a complexity perspective In order to illustrate the value that this meta position holds for business ethics these considerations are explored in terms of the implications that they hold for our understanding of corporate social responsibility for the practice of responsible management and leadership practices and for teaching business ethics *Transdisciplinary Sustainability Studies* Katri Huutoniemi,Petri

Tapio,2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems

figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work
