Accordingly, the role of think tanks in the policymaking process has generated great interest within and outside China. This book explores the behaviour and influence of China's think tanks and explains the reasons and social consequences of the rise of think tanks in China. The book raises several questions on the topic: How did think tanks emerge in China? What are the essential factors that determine think tanks in terms of building their governmental and personal networks? How do think tanks work and build their influence in the Chinese policy process? What happens to Chinese society when think tanks become important policy participants in the policy process? The book goes on to discuss new perspectives on policy processes and elite politics in China and empirically with comparative case study and data from nationwide questionnaire surveys provides a comprehensive picture of think tanks in the current political system of the country.
