China's Coercion of States in the Asia-Pacific Region Maximilian Ernst,2025-02-11 This book explains why China chooses to coerce Asia Pacific regional states despite the risk of such actions creating a backlash and complicating its strategic calculus China s coercion of neighboring states often a variation of heavy informal economic sanctions combined with diplomatic pressure and gray zone coercive measures has been increasingly observable in the past decade It has become an important tool in China s foreign policy toolbox and is frequently used by Beijing to shape the security political environment of the Asia Pacific The book begins with an appreciation of China s complicated geopolitical exposition and an understanding that such coercion creates backlash since the target state will likely be alienated and pushed into closer security cooperation with the United States China s main geopolitical rival Through two in depth case studies of Chinese coercion targeting the Philippines and South Korea respectively the book demonstrates that first the reason China coerces is that the secondary state engages in actions that fundamentally threaten China s security interests and second it will coerce these states only if other policy options geared to change the secondary state s course of action have not worked Employing balance of power theory and particularly wedge strategies the book solves a pertinent research question and improves our knowledge of contemporary security politics in the Asia Pacific This book will be of interest to students scholars and practitioners of Asia Pacific security Chinese foreign policy and international relations **China's World** Kerry

Brown,2017-08-30 In the next decade China s actions on the world stage will affect us all A new superpower with the largest population and GDP on the globe there are now fears that China is becoming more assertive Here award winning China expert Kerry Brown guides us through China s foreign policy from its skirmishes with US Navy destroyers in the South China Sea to its arguments with Japan over the Senkaku Diaoyu Islands and its increased displays of military prowess including huge investments in cyber warfare Brown also assesses China s extraordinary plan to create a New Silk Road across Central Asia one of the biggest infrastructure project in modern history In doing so he seeks to answer a simple question what does China want The answer lies in the unique way China thinks about the world A comprehensive analysis by one of the world s most recognised and respected authorities and based upon unparalleled research into Chinese leaders their beliefs and their instincts China s World is an essential read for the Western world **Looking for Balance** Steve Chan,2013-07-15 Debate surrounding China s rise and the prospects of its possible challenge to America s preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By

drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U S military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance
