Aging with a Disability Bryan J. Kemp, Laura Mosqueda, 2004-06-15 With advances in medical care technology and rehabilitation people with disabilities are now living longer Many in fact have near average life expectancies Research has shown however that the changes and problems associated with aging often occur 10 20 years earlier in the lives of people with disabilities than in the lives of people without disabilities These changes pose significant challenges for health care professionals Because research in this field is relatively recent few practitioners and students are aware of these findings Aging with a Disability provides clinicians with a complete guide to the care and treatment of persons aging with a disability Divided into five parts this book first addresses the perspective of the person with a disability and his or her family Chapters in the second section address the physiological and functional changes people will face as they grow older and how these changes may affect quality of life and caregiver requirements In the third part contributors discuss treatment considerations such as maintaining employment and managing pain and fatigue The book s fourth section focuses on specific conditions spinal cord injury polio cerebral palsy and developmental disabilities such as mental retardation In the concluding section the authors present research needs and discuss policy issues for future consideration Paying special attention to the feelings attitudes and needs of people with disabilities three chapters are written by authors who have a disability Aging with a Disability gives students and clinicians a reliable and compassionate handbook for the treatment of this growing population

Mental Health, Intellectual and Developmental Disabilities and the Ageing Process Vee P. Prasher, Philip W. Davidson, Flavia H. Santos, 2020-12-22 This book brings together findings from research and clinical practice with comprehensive coverage of the important aspects of mental health in ageing persons with intellectual and developmental disabilities It is crucial for professionals involved in the care of persons with all intellectual and developmental disabilities to have a broad understanding of the essential range of issues and therefore this book provides a truly multi disciplinary perspective complete with many figures and illustrations to underline the key points Undoubtedly research and clinical practice are much more advanced in the general ageing population than in persons with intellectual and developmental disabilities and so professionals and academics must be made fully aware of commonalities and idiosyncrasies of older people with intellectual and developmental disabilities This book presents the ongoing developments concerning

mental health and aging which will become relevant to the intellectually disabled population Through experience this book also acknowledges that the impact on the persons themselves and on their carers always needs to be taken into account with treatment programs established with a multi faceted team approach in mind Avoiding the jargon of many titles in this area while maintaining the hands on approach of clinical practice this book meshes the practical and scientific worlds with all chapters written by leading experts in the field Beyond the US the IASSIDD support expands the book message worldwide

Developmental Disability and Ageing Gregory O'Brien,Lewis Rosenbloom,2009-03-09 This handbook is aimed at clinicians and others who are engaged in caring for ageing adults with developmental disabilities It is intended to inform understanding promote assessment assist in care planning and especially to improve everyday living for this needy but sadly often neglected group of vulnerable individuals

The authors base their guidance on evidence focusing on important insights that are likely to be valuable to the clinician interested in the care of the individuals on whose behalf the book has been prepared. A brief general overview of the area is followed by a detailed consideration of dementia in the context of developmental disability including cause, diagnosis, assessment and natural history with case examples. The next chapters concentrate on two of the most high profile of all the major groups of developmental disabilities with their own unique patterns of ageing: Down syndrome and cerebral palsy. Other less common causal syndromes and their characteristics with ageing are then reviewed. This is followed by a detailed guide to drug treatment issues in this group. The final chapter considers wider issues of psychosocial intervention and life planning for the ageing individual with developmental disability. Ageing with a Lifelong Disability Christine Bigby, 2004

This guide provides specialist knowledge about ageing with a disability in the context of the more mainstream knowledge about ageing processes. Dr Bigby uses the concept of successful ageing as a framework in which to consider the issues and practicalities for older people with a pre-existing disability. **Health Promotion for Older Persons with Developmental Disabilities** Susan Guralnick, 1997 **Older Adults With Developmental Disabilities and Leisure** Ted
