Castles in Medieval Society Charles Coulson, 2003 In this challenging new book Charles Coulson overturns many of the traditional assumptions about the nature and purpose of castle building in the middle ages He demolishes the traditional belief that castles were overwhelmingly military in their function showing how this was simply one aspect of a more complicated whole He sets out to recreate the medieval understanding of castles as symbolically fortified places of all kinds from ancient walled post Roman towns and prestigious religious enclaves to transitory campaign forts Going back to the original sources Dr Coulson proposes a new and more subtle understanding of the function and symbolism of castles as well as vivid insights into the lives of the people who inhabited them Fortresses were only occasionally caught up in war but constantly were central to the ordinary life of all classes of the nobility and gentry of widows and heiresses of prelates and clergy of peasantry and townspeople alike **Castles in Medieval Society** presents and explores this broad social panorama

The Medieval Fortresses J.E. Kaufmann, H.W. Kaufmann, 2001-06-21 Two fortifications specialists and a technical artist team up to present a unique portrait of military architecture during the Middle Ages They reveal how the medieval fortress combined both Roman and barbarian features with some influences as far away as China 100 photos 400 diagrams

Castles and Forts Simon Adams, 2003 This guide transports the reader on an amazing journey exploring an array of forts and castles from around the world It examines familiar structures such as the Norman motte and bailey castles found in Britain and parts of Europe and also looks at the natural castles found in Turkey fortifications created by earth movements over the centuries Also explored are the compact Maori forts of New Zealand which contrast with the vast American forts of the colonial period

E. Kaufmann,H. W. Kaufmann,2019-07-30 The authors of *Castrum to Castle* trace the evolution of defensive architecture at the turn of the late Middle Ages and the beginning of the Renaissance Old Barbed Wire Blog Across western Europe the long tradition of castle building took on its most sophisticated form in the later Medieval period and then in response to the development of gunpowder weapons it underwent a fundamental change from castle to fortress This the second volume of a highly illustrated new study of medieval fortification gives a fascinating insight into the last great age of castles and the centuries of violence and conflict they were part of It traces the advances made between the twelfth and the fifteenth centuries looking in particular at the form these fortifications took in contexts as different as Italy Wales France and the Iberian Peninsula Many would regard this period in the history of castles as the classic age It was followed by a phase of relative decline as the conditions of warfare changed and castles had to be adapted to cope with cannon The conventional castle gave way to new styles of fortification But as the authors demonstrate they were still essential factors in military calculations and campaigns they were of direct strategic and tactical importance wherever there was an attempt to take or hold territory A fascinating treatise on the way such buildings were modified to provide protection from growing threats Books Monthly *Crusader Castles* Brian Hoggard,2004 Looks at the costs construction builders and renovations of fortresses created by the Crusaders occupying the Middle East **The World of Castles and Forts** Malcolm Day,1996 An illustrated history of castles and forts through the ages from Mycenaean citadels to bomb shelters
