Charlie Munger The Complete Investor Review:

Charlie Munger, 2018 Charlie Munger Berkshire Hathaway's visionary vice chairman and Warren Buffett's indispensable financial partner has outperformed market indexes again and again and he believes any investor can do the same. His notion of elementary worldly wisdom: a set of interdisciplinary mental models involving economics, business, psychology, ethics, and management allows him to keep his emotions out of his investments and avoid the common pitfalls of bad judgment. Munger's system has steered his investments for forty years and has guided generations of successful investors. This book presents the essential steps of Munger's investing strategy condensed here for the first time from interviews, speeches, writings, and shareholder letters and paired with commentary from fund managers, value investors, and business case historians. Derived from Ben Graham's value investing system, Munger's approach is straightforward enough that ordinary investors can apply it to their portfolios. This book is not simply about investing. It is about cultivating mental models for your whole life but especially for your investments.

academic scholarship on executive remuneration consultants The research covered 18 aspects ranging from an examination of the independence of such consultants to whether there might be a specialised accreditation qualification and or licence to practise regime covering their services It provides novel insights into this previously under researched area of corporate governance financial regulation This book will be of interest to those involved in the UK executive remuneration scene whether government regulators or any of the other parties mentioned already plus academics in universities and business schools It is hoped too that overseas remuneration regimes that have respects in common with the UK s will find this book useful

How to Find a Needle in a Haystack Yair Neuman, 2022-09-05 Searching for a needle in a haystack is an important task in several contexts of data analysis and decision making Examples include identifying the insider threat within an organization the prediction of failure in industrial production or pinpointing the unique signature of a solo perpetrator such as a school shooter or a lone wolf terrorist It is a challenge different from that of identifying a rare event e g a tsunami or detecting anomalies because the needle is not easily distinguished from the haystack This challenging context is imbued with particular difficulties from the lack of sufficient data to train a machine learning model through the identification of the relevant features and up to the painful price of false alarms which might cause us to question the relevance of machine learning solutions even if they perform well according to common performance criteria In this book Prof Neuman approaches the problem of finding the needle by specifically focusing on the human factor from solo perpetrators to insider threats Providing for the first time a deep critical multidimensional and methodological analysis of the challenge the book offers data scientists and decision makers a deep scientific foundational approach combined with a pragmatic practical approach that may guide them in searching for a needle in a haystack
