Cheated Not Poisoned Cheated Not Poisoned:

Cheated Not Poisoned? Michael French, Jim Phillips, 2000-09-02 This book provides the first comprehensive evaluation of Britain's food laws from the 1860s to 1930s and the first analysis of the Victorian anti adulteration legislation in 25 years. The book brings important historical perspectives to the pressing contemporary debate about food safety and the most appropriate forms of regulation by indicating that government policy historically has been shaped by competing business and consumer protectionist pressures.

Germs in the English Workplace, c.1880-1945 Laura Newman, 2021-02-15 This book looks at how the workplace was transformed through a greater awareness of the roles that germs played in English working lives from c 1880 to 1945. Cutting across a diverse array of occupational settings such as the domestic kitchen, the milking shed, the factory and the Post Office, it offers new perspectives on the history of the germ sciences. It brings to light the ways in which germ scientists sought to transform English working lives through new types of technical and educational interventions that sought to both eradicate and instrumentalise germs. It then asks how we can measure and judge the success of such interventions by tracing how workers responded to the potential applications of the germ sciences through their participation in friendly societies, trade unions, colleges and volunteer organisations. Throughout the book, close attention is paid to reconstructing vernacular traditions of working with invisible life in order to better understand both the successes and failures of the germ sciences to transform the working practices and material conditions of different workplaces. The result is a more diverse history of the people's politics and practices that went into shaping the germ sciences in late nineteenth and early twentieth century England.

Food, Science, Policy and Regulation in the Twentieth Century Jim Phillips, David F. Smith, 2013-04-15 This highly topical book offers a comprehensive study of the interaction of food politics and science over the last hundred years. A range of important case studies from pasteurisation in Britain to the E. coli outbreak offers new material for those interested in science policy and the role of expertise in modern political culture.

Hazardous Chemicals Ernst Homburg, Elisabeth Vaupel, 2019-08-01 Although poisonous substances have been a hazard for the whole of human history, it is only with the development and large scale production of new chemical substances over the last two centuries that toxic manmade pollutants have become such a varied and widespread danger. Covering a host of both notorious and little known chemicals, the chapters in this collection investigate the emergence

of specific toxic pathogenic carcinogenic and ecologically harmful chemicals as well as the scientific cultural and legislative responses they have prompted Each study situates chemical hazards in a long term and transnational framework and demonstrates the importance of considering both the natural and the social contexts in which their histories have unfolded

Diet for a Large Planet Chris Otter, 2023-06-05 In this magisterial study Chris Otter traces Britain's transition to a diet rich in animal proteins and refined carbohydrates like wheat and sugar a diet that required more acreage than that of Britain itself and that if followed everywhere would soon deplete the planet's resources as the title announces this was truly a diet for a large planet From the late 1700s to the end of World War II Otter accounts for the structures practices and ideologies generated by Britain's nutrition transition He shows how Britain was the first nation to undergo the population explosion urbanization and industrialization we associate with modernity and how it managed the unprecedented problem of how to feed its growing population Its radical solution would be to outsource its food production leading away from a locally produced plant based diet to one reliant on global markets international trade networks and enormous agro food systems that would have planetary effects on famine war the world economy and the wider earth system Not only did this phase in Britain's history make the consumption of meat white bread sugar and butter a coveted diet linked to development luxury and power it also opened up a new phase in economic history one whose dramatic effects endure to this day whether in terms of health problems eating disorders or the seemingly endless world food crisis

Food Poisoning, Policy, and Politics David F. Smith, H. Lesley Diack, 2005 Study of the 1963-4 typhoid outbreak highlighting issues and debates which are strikingly relevant today The problem of food poisoning and food borne infections is currently one of vigorous debate highlighted since the 1980s by numerous outbreaks and scares involving salmonella in lettuce and eggs listeria in cheese the links between vCJD and BSE E Coli 0157 in cooked meats and foot and mouth disease Yet as this book shows the various issues involved were important as early as 1963-4 when there were serious typhoid outbreaks in Harlow South Shields Bedford and Aberdeen traced to contaminated corned beef imported from Argentina Based upon extensive research using archives which have only recently become available private papers and interviews as well as secondary literature the book analyses the course of the outbreak and looks at the responses of politicians officials health professionals business interests the media and the public It also considers the difficult issue of the weighing off food safety against international trade and other business and economic interests conflicts between government departments rivalry between professionals such as doctors and veterinarians the effects upon and influence of victims and local communities and the conduct of and responses to an official enquiry Overall it draws out generic lessons for how such epidemics should be handled adding an historical perspective to contemporary debates

A Rainbow Palate Carolyn Cobbold, 2024-05-31 We live in a world saturated by chemicals our food our clothes and even our bodies play host to hundreds of synthetic chemicals that did not exist before the nineteenth century By the 1900s a wave of bright coal tar dyes had begun to transform the Western world Originally intended for textiles the

new dyes soon permeated daily life in unexpected ways and by the time the risks and uncertainties surrounding the synthesized chemicals began to surface they were being used in everything from clothes and home furnishings to cookware and food In A Rainbow Palate Carolyn Cobbold explores how the widespread use of new chemical substances influenced perceptions and understanding of food science and technology as well as trust in science and scientists Because the new dyes were among the earliest contested chemical additives in food the battles over their use offer striking insights and parallels into today s international struggles surrounding chemical food and trade regulation

The London Restaurant, 1840-1914 Brenda Assael, 2018-07-03 This is the first scholarly treatment of the history of public eating in London in the Victorian and Edwardian eras The quotidian nature of eating out during the working day or evening should not be allowed to obscure the significance of the restaurant defined broadly to encompass not merely the prestigious West End restaurant but also the modest refreshment room and even the street cart as a critical component in the creation of modern metropolitan culture The story of the London restaurant between the 1840s and the First World War serves as an exemplary site for mapping the expansion of commercial leisure the increasing significance of the service sector the introduction of technology the democratization of the public sphere changing gender roles and the impact of immigration The London Restaurant incorporates the notion of gastro cosmopolitanism to highlight the existence of a diverse culture in London in this period that requires us to think not merely beyond the nation but beyond empire The restaurant also had an important role in contemporary debates about public health and the sometimes conflicting but no less often complementary prerogatives of commerce moral improvement and liberal governance The London Restaurant considers the restaurant as a business and a place of employment as well as an important site for the emergence of new forms of metropolitan experience and identity While focused on London it illustrates the complex ways in which cultural and commercial forces were intertwined in modern Britain and demonstrates the rewards of writing histories which recognize the interplay between broad global forces and highly localized spaces
