Intervening Places of England, Ireland, and Scotland Thomas W. Silloway, 2015-07-10 Excerpt from The Cathedral Towns and Intervening Places of England Ireland and Scotland A Description of Cities Cathedrals Lakes Mountains Ruins and Watering Places The Authors having travelled somewhat leisurely over important parts of Ireland and Scotland and in a yet more deliberate and critical manner over the principal parts of England observing not only salient points in the life of each country but at the same time passing in review their history and work and believing that a synopsis of what their New England eyes ears and minds saw heard and discovered would be acceptable to the public one of them prepared a series of articles which were published in one of the weekly papers of Boston The interest awakened and a belief that these reminiscences should be put into a more permanent form have inclined the authors to amend the articles as the case seemed to demand and they are thus presented in this volume When the original papers were prepared a departure from the usual custom of writers on travel was made Instead of simply recording personal observations the labor was extended by the incorporation of historic and biographic facts the authors hoping that while their work would be valuable and interesting as a compendium to those familiar with the facts it would also be entertaining and instructive to that large class in all communities who are without the means of obtaining such information Care was therefore exercised to obtain data verified by the testimony of various authors About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books

The Cathedrals of Great Britain P. H. Ditchfield, 2018-03-23 Excerpt from The Cathedrals of Great Britain Their History and Architecture In this volume I have attempted to give an architectural description of all the cathedral churches of England Wales and Scotland together with a brief history of each see In order to include any adequate account of each church and bishopric in one volume of portable size which may be of use to visitors in their travels much compression has been necessary but it is hoped that nothing of importance has been omitted which might be useful to those who would read aright the architectural history of our great churches On account of their immense importance in the history of Gothic art it has been thought well to include in this volume some account of the churches of Westminster and Beverley At the close of each history of a cathedral will be found a record of the principal building dates and dimensions and also a brief account of the chief places and churches of interest in the city or neighbourhood which it is advisable to visit About the Publisher Forgiven Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgiven Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Cathedrals of England and Wales Thomas Francis Bumpus, 1905

The Cathedrals of Northern and Southern France Milburg Francisco Mansfield, An attempt to enumerate the architectural monuments of France is not possible without due consideration being given to the topographical divisions of the country which so far as the early population and the expression of their arts and customs is concerned naturally divides itself into two grand divisions of influences widely dissimilar Historians generally agree that the country which embraces the Frankish influences in the north as distinct from that where are spoken the romance languages finds its partition somewhere about a line drawn from the mouth of the Loire to the Swiss lakes Territorially this approaches an equal division with the characteristics of architectural forms well nigh as equally divided Indeed Fergusson who in his general estimates and valuations is seldom at fault thus divides it on a line which follows the valley of the Loire to a point

between Tours and Orleans then southwesterly to Lyons and thence along the valley of the Rhone to Geneva With such a justification then it is natural that some arbitrary division should be made in arranging the subject matter of a volume which treats in part only of a country or its memorials even though the influences of one section may not only have lapped over into the other but as in certain instances extended far beyond As the peoples were divided in speech so were they in their manner of building and the most thoroughly consistent and individual types were in the main confined to the environment of their birth A notable exception is found in Brittany where is apparent a generous admixture of style which does not occur in the churches of the first rank referring to the imposing structures of the Isle de France and its immediate vicinity The Grand Cathedrals of this region are perhaps most strongly impressed upon the mind of whoever takes something more than a superficial interest in the subject as the type which embodies the loftiest principles of Gothic forms and as such they are perhaps best remembered by that very considerable body of persons known as intelligent observers The strongest influences at work in the north from the twelfth century onward have been in favour of the Gothic or pointed styles whilst in the south civic and ecclesiastical architecture alike were of a manifest Byzantine or Romanesque tendency No better illustration of this is possible than to recall the fact that when the builders of the fifteenth century undertook to complete that astoundingly impressive choir at Beauvais they sought to rival in size and magnificence its namesake at Rome which under the care of the Pontiff himself was then being projected Thus it was that this thoroughly Gothic structure of the north was to stand forth as the indicator of local influences as contrasted with the Italian design and plans of the St Peter s of the south A discussion of the merits of any territorial claims as to the inception of what is commonly known as Gothic architecture under which name for the want of a more familiar term it shall be referred to herein is quite apart from the purport of this volume and as such it were best ignored The statement however may be made that it would seem clearly to be the development of a northern influence which first took shape after a definite form in a region safely comprehended as lying within the confines of northeastern France the Netherlands and the northern Rhine Provinces Much has been written on this debatable subject and doubtless will continue to be either as an arrow shot into the air by some wary pedant or an equally unconvincing statement without proof of some mere follower in the footsteps of an illustrious but behind the times expert It matters not as a mere detail whether it was brought from the East in imperfect form by the Crusaders and only received its development at the hands of some ingenious northerner or not Its development was certainly rapid and sure in the great group which we know to day in northern France and if proof were wanted the existing records in stone ought to be sufficiently convincing to point out the fact that here Medi val Gothic architecture received its first and most perfect development The Primaire the development of the style finding its best example at Paris The Secondaire the Perfectionnement at Reims and its Apogee at Amiens The Tertiaire practically the beginning of the decadence in St Ouen at Rouen only a shade removed from the debasement which soon followed As to the merits or demerits of the contemporary structures of other nations that also would be obviously of

comparative unimportance herein except so far as a comparison might once and again be made to accentuate values
