## **Causality In Sociological Research Synthese Library:**

Causality in Sociological Research Jakub Karpinski, 2012-12-06 The general treatment of problems connected with the causal conditioning of phenomena has traditionally been the domain of philosophy but when one examines the relationships taking place in the various fields the study of such conditionings belongs to the empirical sciences Sociology is no exception in that respect In that discipline we note a certain paradox Many problems connected with the causal conditioning of phenomena have been raised in sociology in relatively recent times and that process marked its empirical or even so called empiricist trend That trend labelled positivist seems in this case to be in contradiction with a certain type of positivism Those authors who describe positivism usually include the Humean tradition in its genealogy and remembering Hume's criticism of the concept of cause speak about positivism as about a trend which is inclined to treat lightly the study of causes and confines itself to the statements on co occurrence of phenomena

**Research Handbook on Analytical Sociology** Manzo, Gianluca, 2021-12-14 Providing an up to date portrait of the concepts and methods of analytical sociology this pivotal Research Handbook traces the historical evolution of the field utilising key research examples to illustrate its core principles It investigates how analytical sociology engages with other approaches such as analytical philosophy structural individualism social stratification research complexity science pragmatism and critical realism exploring the foundations of the topic as well as its major explanatory mechanisms and methods

**A Primer to Causal Reasoning About a Complex World** Lars-Göran Johansson, Thomas Banitz, Volker Grimm, Tilman Hertz, Emilie Lindkvist, Rodrigo Martínez Peña, Sonja Radosavljevic, Petri Ylikoski, Maja Schlüter, 2024-06-22 This open access book is about causal thinking and the use of causal language with a focus on introducing philosophical ideas about causation to students and researchers of Social Ecological Systems SES It takes a systematic approach to three central topics the meanings of different causal expressions sufficiency of evidence for inferences from observations to causal relations and how to handle the complexity of causal relations in social ecological systems Consequently the book is divided into three parts In the first part the authors analyse and discuss the use of causal idiom in ordinary language and in the second part they scrutinise the use of causal concepts and causal inference in science Finally the authors discuss causal reasoning about social ecological systems in multi and interdisciplinary contexts This book provides an analysis of the concept of causation useful in the empirical sciences where causal notions and idioms often are used without sufficient reflection Empirical sciences often use causal idiom drawn from ordinary language and similarly there is little formalisation of causal language and technical concepts in the humanities and social sciences This book is a valuable resource for the application of current philosophical discussions about the concept of causation in particular when applied to the analysis of social ecological systems but also when applied to research in the sciences and humanities

*The Philosophy of Michael Dummett* Brian McGuinness, G. Oliveri, 1994-04-30 This book contains seminal discussions of central issues in the philosophy of language mathematics mind religion and time Is common language

conceptually prior to idiolectics What is a theory of meaning Does constructivism provide a satisfactory account of mathematics What are indefinitely extensible concepts Can we change the past These are only some of the very important questions addressed here Both the papers written by the contributors and Dummett's replies provide a great wealth of stimulating ideas for those who currently do research in the respective areas touched upon without making the reading exceedingly tedious This feature common to most of the papers in this book makes it possible to use the material presented in undergraduate courses at university level

**Statement and Referent** D.S. Shwayder,2013-04-17 There are in this volume sentences written as long ago as 1957 What was then projected as the third part of a modest discussion of then current issues has through some fifteen revisions now expanded into its own three parts Of the project as originally conceived the first part itself grown too large was published prematurely I now believe in 1965 *Stratification of Behaviour* The second part which was to be on language proper was abandoned around 1967 such materials on language as I need for the present work are now mostly compressed into Chapter 1 with some scatterings retained in Chapters 2 and 14 My scheme discovered problems with which I have been much preoccupied I have been less enjoyably delayed by missteps Additions were put on and the renovations have been incessant Even in the course of my ultimate revisions I ran into slippery stretches and soft spots I could only gesture at repairing But now time is running out and my energy is ebbing and I must allow the work to come to its conclusion with reservations certainly and not without a sense of despair If the reception of this volume warrants the two following parts will be wound up in what I hope may be fairly short order

*Real Numbers, Generalizations of the Reals, and Theories of Continua* P. Ehrlich,2013-06-29 Since their appearance in the late 19th century the Cantor Dedekind theory of real numbers and philosophy of the continuum have emerged as pillars of standard mathematical philosophy On the other hand this period also witnessed the emergence of a variety of alternative theories of real numbers and corresponding theories of continua as well as non Archimedean geometry non standard analysis and a number of important generalizations of the system of real numbers some of which have been described as arithmetic continua of one type or another With the exception of E W Hobson's essay which is concerned with the ideas of Cantor and Dedekind and their reception at the turn of the century the papers in the present collection are either concerned with or are contributions to the latter groups of studies All the contributors are outstanding authorities in their respective fields and the essays which are directed to historians and philosophers of mathematics as well as to mathematicians who are concerned with the foundations of their subject are preceded by a lengthy historical introduction

*Other Minds* Alec Hyslop,2013-03-09 This book has been a long time in the making Other issues have taken me away from it from time to extended time But I kept coming back to the problem of other minds It has remained a great issue it is much contested still and it is after all close to us all I like believing that the time taken has deepened my understanding of the problem and how it is to be handled Other people some by disagreeing vehemently have helped greatly I mention in particular Brian Ellis Robert

Fox Graeme Marshali Tim Oakley Ray Pinkerton and Robert Young Robert Pargetter argued with me and kept insisting that I write this book John Bigelow Michael Bradley Keith Campbell Frank Jackson and William Lycan assisted by reading an earlier version and providing valued comments Frank Jackson has been specially helpful not just on this topic He can be blamed for initially causing me to take the analogical inference seriously The La Trobe Philosophy Department has been a good place to do philosophy I am grateful to Suzanne Hayster Sandra Paul and Betty Pritchard for struggling at various times with various recalcitrant manuscripts Most particularly I thank Gai Larkin She has seen the project through with considerably more than efficiency

Knowing from Words Bimal K. Matilal, A. Chakrabarti, 2013-06-29 Never before in any anthology have contemporary epistemologists and philosophers of language come together to address the single most neglected important issue at the confluence of these two branches of philosophy namely Can we know facts from reliable reports Besides Hume's subversive discussion of miracles and the literature thereon testimony has been bypassed by most Western philosophers whereas in classical Indian Pramana theories of evidence and knowledge philosophical debates have raged for centuries about the status of word generated knowledge Is the response I was told by an expert on the subject as respectable as I saw or I inferred in answer to How do you know is a question answered in diverse and subtle ways by Buddhists Vaisheshikas and Naiyayikas For the first time this book makes available the riches of those debates translating from Sanskrit some contemporary Indian Pandits reactions to Western analytic accounts of meaning and knowledge For advanced undergraduates in philosophy for researchers in Australia Asia Europe or America on epistemology theory of meaning Indian or comparative philosophy as well as for specialists interested in this relatively fresh topic of knowledge transmission and epistemic dependence this book will be a feast After its publication analytic philosophy and Indian philosophy will have no excuse for shunning each other

**Nominalism and Contemporary Nominalism** M. Gosselin, 2012-12-06 Though the subject of this work nominalism and contemporary nominalism is philosophical it cannot be fully treated without relating it to data gathered from a great variety of domains such as biology and more especially ethology psychology linguistics and neurobiology The source of inspiration has been an academic work I wrote in order to obtain a postdoctoral degree which is called in Belgium an Aggregaat voor het Hoger Onderwijs comparable to a Habilitation in Germany I want to thank the National Fund of Scientific Research which accorded me several grants and thereby enabled me to write the academic work in the first place and thereafter this book I also want to thank Prof SJ Doorman Technical University of Delft and Prof G Nuchelmans University of Leiden who were members of the jury of the Aggregaatsthesis presented to the Free University of Brussels in 1981 and who by their criticisms and suggestions encouraged me to write the present book the core of which is constituted by the general ideas then formulated I am further obliged to Mr X the referee who was asked by Jaakko Hintikka to read my work and who made a series of constructive remarks and recommendations My colleague Marc De Mey University of Ghent helped me greatly with the more formal aspects of my work and spent too much of his valuable time and

energy to enable me to deliver a presentable copy All remaining shortcomings are entirely my responsibility I asked Prof

*Representational Ideas* R. A. Watson, 2012-12-06 In *Representational Ideas From Plato to Patricia Churchland* Watson argues that all intelligible theories of representation by ideas are based on likeness between representations and objects He concludes that 17th century materialist criticisms of having mental representations in the mind apply to contemporary material representations in the brain as proposed by neurophilosophers The argument begins with Plato with particular stress on Descartes Malebranche and Arnauld He then proceeds with an examination of the picture theory developed by Wittgenstein Carnap and Goodman and concludes with an examination of Patricia Churchland Ruth Millikan Robert Cummins and Mark Rollins The use of the historical development of representationalism to pose a central problem in contemporary cognitive science is unique For students scholars and researchers in neuroscience cognitive science philosophy of mind and modern philosophy
