Computerized Vehicle Routing And Scheduling In Road Transport:

Computerised Vehicle Routing and Scheduling in Road Transport Peter Eibl, 1996 Over the past 20 years academics industry commentators and practitioners in the field of physical distribution have been preoccupied with the computational and technical side of computerized vehicle routing and scheduling Comparatively little research has been carried out on the user or management aspects of the technology This study investigates the adoption of CVRS technology Moreover the study evaluates the success of the software used in both a strategic tactical and in an operational role The findings highlight that CVRS technology is used by only a relatively small number of organizations despite being an effective means to improve the efficiency of transport operations and to provide substantial intangible benefits **Efficient Road Transport Scheduling**

John Edward Sussams, 1971 *Green Logistics* Alan McKinnon, Michael Browne, Anthony Whiteing, 2012-12-03 As concern for the environment rises companies must take more account of the external costs of logistics associated mainly with climate change air pollution noise vibration and accidents Green Logistics analyzes the environmental consequences of logistics and how to deal with them Written by a leading team of logistics academics the book examines ways of reducing these externalities and achieving a more sustainable balance between economic environmental and social objectives It examines key areas in this important subject including carbon auditing of supply chains transferring freight to greener transport modes reducing the environmental impact of warehousing improving fuel efficiency in freight transport reverse logistics for the management of waste The new edition is completely updated throughout with new methodologies and case studies to illustrate the impact of green logistics in practice **Decision Support Systems: Experiences and Expectations** T.

Jelassi, M.R. Klein, W.M.
