Low-Cost Aviation Weiqiang Lin, Jean-Baptiste Fretigny, 2022-06-15 Low Cost Aviation: Aeromobilities, Culture, Politics, and Infrastructures covers critical societal issues such as labor regimes, unequal and changing flying publics, transnational dynamics of migration, tourism, business experiences, environmental challenges, and shifting territorialities of LCCs at various scales. It situates LCCs holistically within a societal infrastructural regime rather than solely within a transport context. The book explores the changing nature of passengers' profiles and mobile cultures, new consumption patterns, and Economic Reconfigurations as well as geopolitical and sustainability challenges. Providing a research agenda for aeromobilities, the book examines the most pressing social, cultural, and political impacts of LCCs on society in different global contexts. It bridges transport and mobility studies, fostering transport sustainability and mobility justice to improve air transport management. Offers empirically grounded insights on key social issues and their implications. Draws on the expertise of an international team of scholars across the social sciences, including geography, urban studies, history, and economics. Utilizes case studies from Asia, America, and Europe. Provides context, theoretical approaches, models, and examples showing how they have been implemented.
