Chasing The Flying Saucers:

Chasing the Flying Saucers Gray Barker, Andrew Colvin, David Halperin, Rick Hilberg, 2015-01-20 In the late 1950s and early 1960s the heyday of classic saucering the most popular UFO magazine in the world was Ray Palmer's Flying Saucers. The most popular column in this widely distributed periodical was Chasing the Saucers a series authored by literary great Gray Barker. From his secret headquarters deep in the hills of West Virginia Barker scoured newspapers and wire services from all over the world bringing his fans the most up to date news on the latest UFO encounters and unusual Fortean events. At times sober and objective at other times intimate speculative and self deprecating Barker displays the full palette of his trade drawing the reader into his own unique and fascinating world the world of the saucers. As one turns these pages one learns much about what really happened in those halcyon days and what was going on behind the scenes of ufology. Barker's eye for detail and understanding of human psychology add special flair to this classic study of a true paranormal enigma. This special 2015 reprint provides in depth coverage on several famous UFO cases in many instances the first reports ever generated about them making Chasing the Flying Saucers an indispensable resource for today's paranormal investigator. Also featured are enlightening introductions from two of Barker's trusted friends and colleagues editor Rick Hilberg and Prof David J Halperin. A true master of suspense UFO Magazine One mystery delightfully studying another one Tiny Tim Responsible reportage from one of a very few privy to the secret of the saucers Commander X. A fabulous and rich blend of style and substance without which the golden age of flying saucers might never have existed. London Monthly Journal

The Saucerian Gabriel Mckee, 2025-04-22 The strange but true biography of the colorful founder of Saucerian Books a central purveyor and promoter of flying saucer and conspiracist knowledge in the mid twentieth century Gray Barker. 1925-1984 was an eccentric literary outsider filled with ideas that were out of step with the world. An author and unreliable narrator of implausible stories Barker founded and operated Saucerian Books an independent publisher of books about flying saucers and other ideas at the fringes of popular discourse. In The Saucerian Gabriel Mckee tells the fascinating story of Barker's West Virginia based press the unique corpus of materials it published and how office copying and self publishing techniques influenced the spread of paranormal beliefs and conspiratorial worldviews over the last century. Following the development of UFO subculture Mckee explores the life and career of a larger than life hoaxer and originator of pseudoscientific ideas. Ever an entertainer Barker established his reputation with one of the first flying saucer fanzines The Saucerian and with his first book the conspiratorial and sensationalistic They Knew Too Much about Flying Saucers. By the close of the 1950s he had established a publishing imprint that brought out some of the strangest UFO related books of the era with a particular emphasis on flying saucer contactees. Saucerian Books became a platform for those whose stories were too unusual implausible or crudely written for more mainstream publishers. Though Barker himself was a skeptic he viewed the world of occult believers as a source of ongoing entertainment. He also may have used the perceived eccentricity of flying

saucer research or ufology to obscure his homosexuality from his small town neighbors From his place on the fringes of midcentury American culture Barker left an unmatched legacy in conspiratorial concepts that have become prominent pop cultural folklore including the Men in Black the Mothman and the Philadelphia Experiment As a mastermind behind the fantastical Barker s promotional efforts were the precursor to contemporary conspiracism **The World of Flying**

After the Flying Saucers Came is a comprehensive account of the stories the people and the strange events that went into making the fascination with UFOs and aliens a worldwide phenomenon among believers skeptics and the simply curious It traces how an odd sighting of flying saucers by an American pilot in 1947 inspired governments the media scientists writers and the general public to consider the possibility that extraterrestrials were visiting earth Flying Saucers and Science Stanton T. Friedman,2008-06-15 The nuclear physicist and leading UFO researcher reveals the science behind interstellar travel and the US government s extraterrestrial cover up In this comprehensive look at the scientific data concerning flying saucers nuclear

physicist Stanton T Friedman distills more than forty years of research and explains it all in layman's terms. He shows how travel to nearby stars is possible without violating the laws of physics and examines data from a number of scientific UFO studies that nearly no one else has discussed in detail. Photographs of little-known advanced propulsion systems, some of which he worked on himself, are included as well. Beyond his presentation of the scientific data, Friedman demonstrates that the United States government's disinformation policy regarding UFOs amounts to nothing less than a Cosmic Watergate. He reveals the reasons for this cover-up, possible reasons for aliens to come to Earth, and their reasons for not landing on the White House lawn. In this book, readers will discover: What type of energy and technologies could provide travel between the stars? The most likely regions of the universe to cultivate alien life? Why the aliens have come to Earth? Who believes in the flying saucer phenomenon?

The Flying Saucers are Real Donald E. Keyhoe, 2019-11-21

Written in a vigorous and engaging journalistic style, the book synthesizes eyewitness accounts, government secrecy, and military interactions, paving the way for a compelling argument that challenges the scientific and societal norms of his time. Keyhoe's work emerged during the post-World War II era, a period marked by technological advancement and increasing public fascination with the cosmos, framing the discourse around UFOs not just as folklore but as a serious phenomenon worthy of investigation. Keyhoe, a former Marine Corps major and aviation writer, possessed a unique perspective influenced by his military background and encounters with aviation experts. His experiences during and after the war, coupled with his incisive understanding of aviation technology, equipped him to advocate for greater transparency regarding aerial phenomena. His relentless pursuit of the truth reflects a broader cultural curiosity about the unknown and highlights the tension between government authority and public inquiry that pervaded the Cold War era.
