Chinas Agrarian Transition Challenges Development:

China's Agrarian Transition René Trappel, 2015-12-18 More than thirty years ago the political turn that brought the dismantling of agricultural collectives and exclusive rights to small plots of farmland for rural families initiated a historic return to smallholding in the People's Republic of China. Today agriculture in China is changing again. In many villages smallholder farming is giving way to large agricultural enterprises. This book explores this latest transformation of Chinese agriculture. It traces how the peasantry's frustration with the farming conditions, the priorities of national and local political agents and the changes in the management of collective land since the return to family based farming have paved the way for a unique Chinese agrarian transition. The argument is based on careful analysis of agricultural politics since the early 1980s and data gathered in three field trips to Shandong, Sichuan and Guizhou Provinces between 2008 and 2010. The findings highlight the importance of institutional path dependencies and strategic government intervention or its absence for economic transformation. China's Agrarian Transition is one of the first comprehensive accounts of the latest developments in agriculture in the People's Republic and will provide a stimulating read for political scientists, sociologists, economists and experts on China interested in the ongoing transformation of China's countryside.

Land Use Transitions and Rural Restructuring in China Hualou Long, 2020-05-27 Intended as a comprehensive guide to the study of land use and rural development, this book offers detailed descriptions of land use transitions and rural restructuring. To do so, it chiefly focuses on three main aspects: the first of which is the application of geographical perspectives in order to understand rural issues in connection with urbanization, industrialization, globalization and rural vitalization strategies in contemporary China. Secondly, it presents a rich blend of regional and national analyses, detailed explorations of local cases and critical and theoretically informed discussions that address historical paths and future projections. Lastly, it adapts concepts derived from western literature to situations and experiences in rural China and provides empirical evidence from an insider perspective. Given its scope, the book offers a valuable resource for researchers and for graduate students, courses in geography and sociology.

Challenges and Opportunities for Chinese Agriculture Wensheng Chen, 2020-07-06 This book elaborates on the transformation of agricultural development in China into the construction of a resource and ecologically sound society and the coordinated development of industrialization, urbanization and agricultural modernization in China. It focuses on the multiple goals of transforming the Chinese agricultural development model, inner motivations, approaches and supporting systems under environmental and resource constraints. The author endeavors to build a theoretical framework for transforming agricultural development model in the construction of a resource and ecologically sound society. To achieve this, the author addresses successively across seven chapters issues such as the multiple goals of China's agricultural development, transformation under resource and environmental constraints, the transformation of the utilization mode of resources, resource and ecologically sound agriculture oriented agricultural production system transformation, the

transformation of commercialized rural service system and institutional innovations in the resource and ecologically sound agricultural transformation

Challenges to China's Economic Statecraft Yi Edward Yang, 2019-08-09 Fueled by its surging economic strength China has been increasingly utilizing economic tools such as trade foreign aid foreign direct investment and sanctions to pursue strategic and security interests on the world stage This approach known as economic statecraft has thus far received mixed policy results and ambivalent reactions from the international community This book presents a collection of global assessments of China's economic statecraft The contributors to this volume answer three key questions What are the challenges faced by China's economic statecraft Why is China sometimes able to achieve its foreign policy objectives via economic statecraft and sometimes not How do foreign countries particularly the targets of China's economic statecraft respond to China's strategies This comprehensive study examines economic statecraft in the context of more than a dozen nations and international organizations across four continents thus providing a truly global perspective

Agricultural Reform and Rural Transformation in China since 1949 Thomas DuBois, Huaiyin Li, 2016-07-11 Since its founding the government of the People's Republic of China has strived to transform rural production the theme of this volume of History of Contemporary China Fourteen articles translated from the Chinese journal Contemporary History Dangdai Zhongguo shi yanjiu offer both empirical account and theoretical analysis of a broad range of historical events and issues such as the guiding policy framework of the three rural issues the causes and consequences of the deep plowing movement and the development of public canteens during the Great Leap Forward child care enterprises and collectives and private lending in the post Mao era and the changing dynamics of interregional flows of goods and people throughout the second half of the 20th century These studies shed light on the historical origins of some of the agricultural and rural problems in China today

Social Economy in China and the World Ngai Pun, Ben Hok-bun Ku, Hairong Yan, Anita Koo, 2015-08-20 Thirty years of economic transformation has turned China into one of the major players in the global capitalist economy However its economic growth has generated rising problems in inequality alienation and sustainability with the agrarian crises of the 1990s giving rise to real social outcry to the extent that they became the object of central government policy reformulations Contributing to a paradigm shift in the theory and practices of economic development this book examines the concept of social economy in China and around the world It offers to rethink space economy and community in a trans border context which moves us beyond both planned and market economies The chapters address theoretical issues critical reflections and case studies on the practice of social economy in the context of globalization and its attempt to create an alternative modernity Through this the book builds a platform for further cross disciplinary and cross boundary dialogue on the future of social economy in China and the world With examples from Asia North America Latin America and Europe this book will not only appeal to students and scholars of Chinese and Asian social policy and development but also those of social economy from an international perspective

Handbook of Chinese Economics

Zhuoyuan Zhang,2023-06-30 This book reviews the development of Chinese economics since the reform and opening up associated with the history and experience of China s economic growth This book makes a systematic study of the direction of reform the method of reform the path of reform the main body of reform and the motive force of reform accumulates more experiences that can be used for reference for the exploration of new reforms to be opened and probes into the way of reform in the next period The topics cover all key concepts and theories relating to the China s economic reform **China's Great**

Economic Transformation Loren Brandt,Thomas G. Rawski,2008-04-14 This landmark study provides an integrated analysis of China s unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China s remarkable combination of high speed growth and deeply flawed institutions Their work exposes the mechanisms underpinning the origin and expansion of China s great boom Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development The editors probe both achievements and weaknesses across many sectors including China s fiscal legal and financial institutions The book shows how an intricate minuet combining China s political system with sectorial development globalization resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt The Geographical

Transformation of China Michael Dunford,Liu Weidong,2014-10-17 The aim of this book is to examine the transformation of the geography of China in the years since the start of China s policy of reform and opening up in 1978 as seen through the eyes of Chinese geographers Throughout that period Chinese geographers have studied these environmental economic political and cultural processes closely drawing on sources that are far from easy to access and have published their results in Chinese Much of this research has underpinned the Chinese government s assessment of policies and the policy choices at different levels yet it is not well known outside of China This volume deals with aspects of the socio economic geography of China s transformation including its changing relations with the rest of the world although it also deals with the impact of China s development path on the country s ecological systems Each chapter deals with aggregate trends and specific cases to show the ways in which the particular characteristics of China s economic and social order economic organization political system and cultural model and values have shaped and are shaped by its geography **Rural Revitalization in China**

Xiwen Chen,Houkai Wei,Yaping Song,2023-02-22 On the basis of systematically summarizing and sorting out the significant achievements made since China s rural reform this book comprehensively explains the theoretical basis principles and strategies of the road to rural revitalization of socialism with Chinese characteristics Through in depth research on nine aspects of rural basic management system rural deepening reform food security modernization of agriculture and rural areas integrated development of urban and rural areas poverty alleviation new rural construction ecological civilization construction and rural governance this book puts forward the development direction and strategic choice of China s rural revitalization by the middle of this century It not only enriches and develops the theory of development economics but also

provides experiences for rural development in developing countries
