A Century of Change in a Chinese Village Lin Juren, Xie Yuxi, 2018-05-04 Over the last half century China has evolved from a poor rural country to a geopolitical powerhouse Rapid urbanization has been at the heart of that transformation and as migrant laborers have left their villages what has become of the rural communities that were once the center of economic social and cultural life And how do contemporary Chinese scholars understand those changes These are the questions that this compelling book answers Lengshuigou village located near the Shandong provincial capital of Jinan was first studied by Japanese social scientists in the early 1940s and then again in the 1980s and 1990s Building on these rich surveys this book traces changes from the early twentieth century to the present day in family and lineage social stratification personal networks annual and life cycle rituals village politics and elite formation Drawing on their own large scale survey of contemporary village households the authors analyze the physical and institutional changes that have altered the community as well as the shifts in interpersonal relations and attitudes that have upended centuries old systems of patriarchy and generational order This important book presents for the first time in English analysis by Chinese sociologists on the radical transformation of Chinese rural society

Becoming Chinese Wen-hsin Yeh, 2023-11-15 This volume evaluates the dual roles of war and modernity in the transformation of twentieth century Chinese identity The contributors all leading researchers argue that war no less than revolution deserves attention as a major force in the making of twentieth century Chinese history Further they show that modernity in material culture and changes in intellectual consciousness should serve as twin foci of a new wave of scholarly analysis Examining in particular the rise of modern Chinese cities and the making of the Chinese nation state the contributors to this interdisciplinary volume of cultural history provide new ways of thinking about China's modern transformation up to the 1950s Taken together the essays demonstrate that the combined effect of a modernizing state and an industrializing economy weakened the Chinese bourgeoisie and undercut the individual's quest for autonomy Drawing upon new archival sources these theoretically

informed thoroughly revisionist essays focus on topics such as Western inspired modernity urban cosmopolitanism consumer culture gender relationships interchanges between city and countryside and the growing impact of the state on the lives of individuals The volume makes an important contribution toward a postsocialist understanding of twentieth century China This volume evaluates the dual roles of war and modernity in the transformation of twentieth century Chinese identity The contributors all leading researchers argue that war no less than revolution deserves attention as a major force in the making of

The Political Economy of Chinese Development Mark Selden, 2016-09-16 The first edition of The Political Economy of Chinese Socialism reconceptualized the political economy of China by highlighting the changing character of urban rural and state society conflicts in the era of Mao Zedong's leadership and in the contemporary post Mao reforms The economic and social crises that engulfed China and indeed much of the rest of the socialist world in the late 1980s culminating in the 1989 democratic movement and its suppression stimulated a rethinking of central propositions of the first edition It particularly led the author to inquire anew into the meaning of socio political as well as economic development in a populous and poor agrarian nation This volume then assesses the economic performance and social consequences of China's political economy over four decades with a focus on China's countryside and city countryside relations In addition to a reconceptualization and updating of the introductory chapter there is a new chapter The Social Origins and Limits of the Chinese Democratic Movement

North China at War Chongyi Feng, David S. G. Goodman, 2000 This groundbreaking volume draws on newly available documentary sources to explore key facets of the move to power of the Chinese Communist Party CCP during the War of Resistance to Japan from 1937 to 1945 Leading scholars from China and the West compare the varied experiences of the CCP and its interactions with local society in all the border regions and base areas of resistance to the Japanese invasion

on the North China battlefield. Eschewing grand theory, the authors develop a social ecology of revolution that traces the relationship between local conditions and patterns of social and political change.
