Chinese Strategy and Military Modernization in 2015 Anthony H. Cordesman, Steven Colley, 2016-01-12 China's emergence as a global economic superpower and as a major regional military power in Asia and the Pacific has had a major impact on its relations with the United States and its neighbors. China was the driving factor in the new strategy the United States announced in 2012 that called for a rebalance of U.S. forces to the Asia Pacific region. At the same time, China's actions on its borders in the East China Sea and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers.

*China's Foreign Relations and Security Dimensions* Geeta Kochhar, 2018-03-19 China is the world's second largest economy and a key player in world politics. This book looks at China's foreign policy from a macro perspective. It analyses China's peripheral and regional policy as well as its relations with other major powers, India and Russia. It offers insight into the historical security concerns of China and the linkages of internal domestic issues with external diplomacy which reshape its relations with neighbouring countries. The volume also examines President Xi Jinping's foreign policy orientations and aspirations for the future. In face of growing global concern on China's hegemonic ambitions in the region, the book gauges the tensions between China and Japan in the South China Sea as well as the apprehensions of several smaller Asian countries that may perceive China's strategic and geo-economic advantages and military strength as a threat. This book will be useful to scholars and researchers of China studies, politics, foreign policy, international relations, military and strategic studies, defence and security studies, area studies and political studies.

### **Obama and the Emergence of a Multipolar World**

**Order** Chris J. Dolan, 2018-11-15 This book argues that critical international and domestic crises such as the U.S. war in Iraq and the Great Recession forced President Barack Obama to readjust U.S. foreign policy after over 70 years of American hegemony and defending the global status quo. It examines the range of external pressures and challenges brought on by an increasingly multipolar international system, shifting domestic political forces and limited foreign policy choices. The book provides an overview of the extent of foreign policy change and continuity in Obama's foreign policy toward Europe, Asia and the Pacific and the Middle East. The book assesses domestic and international pressure points in the wake of the 2003 U.S. invasion of Iraq and the Great Recession that shaped and defined Obama's foreign policy preferences. The war in Iraq and the

Great Recession in addition to rising economic inequality and hyper partisanship at home emerging markets in Asia and the rise of China and Russian resurgence in Europe and the Middle East would determine and constrain the extent to which Obama was able to lead U S foreign policy and the foreign policymaking process These ultimately contributed to a more scaled back and limited U S role in the world during Obama s presidency culminating in the 2016 presidential election of Donald Trump who promised to turn the U S away from globalization and questioned longstanding U S alliances In the end the theme of nation building here at home under Obama gave way to America First under Trump

*Avoiding the 'Thucydides Trap'* Dong Wang, Travis Tanner, 2020-12-29 As the relationship between China and the United States becomes increasingly complex and interdependent leaders in Beijing and Washington are struggling to establish a solid common foundation on which to expand and deepen bilateral relations In order to examine the challenges facing U S China relations the National Bureau of Asian Research NBR and the Institute for Global Cooperation and Understanding iGCU at Peking University brought together a group of leading experts from China and the United States in Beijing and Honolulu to develop a conceptual foundation for U S China relations into the future tackling the issues in innovative ways under the banner of U S China Relations in Strategic Domains The resulting chapters assess U S China relations in the maritime and nuclear sectors as well as in cyberspace and space and through the lens of P2P and mil to mil exchanges Scholars and students in political science and international relations are thus presented with a diagnosis and prognosis of the relations between the two superpowers

**China's Air Power and Maritime Strategies Towards the Indian Ocean Region** Joshy M. Paul, 2025-02-03 This book examines China s naval and airpower strategic direction towards the Indian Ocean region It discusses China s military modernization program along with naval and airpower capabilities including expeditionary nature It analyses China s attempt to gain a strategic dominance in the IOR by means of investments and trade with the littoral countries military diplomatic relationship with friendly countries permanent presence of naval systems in the Indian Ocean and delivering public goods throughout the region A comparative analysis of People s Liberation Army Air Force PLAAF expeditionary capabilities and Indian Air Force s IAF deterrence mechanisms is also included Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

*Armed Coexistence* Stephen P. Westcott, 2022-02-04 This book is the first to comprehensively explore the origins and reasons behind the Sino Indian border dispute s intractability Utilising an array of accurate maps tables archival and scholarly research this book shows how an ambiguous frontier became a contested border and how it has become relatively pacified yet remaining unresolved Unlike previous examinations however this book also provides a theoretically based explanation as to why it is so difficult for an interstate border dispute to be resolved By examining a wide range of salient actors from state leaders to the individual governing organisations to the State itself it is shown that it is usually in their interest to maintain the status quo rather than seek some form of resolution thereby ensuring that the border dispute

remains intractable With both China and India shaping up to be major powers throughout the twenty first century a detailed examination of the major issue of contention between them is more pertinent now than ever China, Russia, and Twenty-First Century Global Geopolitics Paul J. Bolt, Sharyl N. Cross, 2018-02-02 This book provides a comprehensive analysis of the Chinese Russian bilateral relationship grounded in a historical perspective and discusses the implications of the burgeoning strategic partnership between these two major powers for world order and global geopolitics The volume compares the national worldviews priorities and strategic visions for the Chinese and Russian leadership examining several aspects of the relationship in detail The energy trade is the most important component of economic ties although both sides desire to broaden trade and investments In the military realm Russia sells advanced arms to China and the two countries engage in regular joint exercises Diplomatically these two Eurasian powers take similar approaches to conflicts in Ukraine and Syria and also cooperate on non traditional security issues including preventing coloured revolutions cyber management and terrorism These issue areas illustrate four themes Russia and China have common interests that cement their partnership including security protecting authoritarian institutions and re shaping aspects of the global order They are key players not only influencing regional issues but also international norms and institutions The Sino Russian partnership presents a potential counterbalance to the United States and democratic nations in shaping the contemporary and emerging geopolitical landscape Nevertheless the West is still an important partner for China and Russia Both seek better relations with the West but on the basis of mutual respect and equality Lastly Russia and China have frictions in their relationship and not all of their interests overlap The Sino Russian relationship has gained considerable momentum particularly since 2014 as Moscow turned to Beijing attempting to offset tensions with the West in the aftermath of Russia's annexation of Crimea and intervention in Ukraine However so far China and Russia describe their relationship as a comprehensive strategic partnership but they are not allies **Asian Defence Review 2016** Air Marshal Vinod Patney, 2016-05-15 Last year the war in Syria became a melee the US Russia NATO Saudi Arabia Iran Turkey Lebanon and some others struggled to bring peace to the region But each stakeholder hankered after a different end state President Bashar al Assad's continuance in power became a contentious issue In due course of time Syria and the Islamic State in Syria ISIS jumped the order of priorities for the US forces in the area In importance they have left behind the drawdown in Afghanistan which has been back burned provisionally As it appears garnering the support of the countries of the region like India Japan South Korea the Philippines etc to counter the rise of China will continue to be high on the US agenda Likewise lifting of sanctions against Iran following its rapprochement with the West will influence the world in many ways The fallout of the testing of the hydrogen bomb by North Korea the South China Sea imbroglio and Indo Pak relations in the wake of the Pathankot terror strike too will cast their shadows on the geo politics of the region in 2016 Evading war and conflict in the prevailing environment is an effort economic interests and geo political compulsions make the choice of alignment difficult for peace loving nations of the world

They are faced with the dilemma of evading armed conflicts. It requires a conscious and sustained effort to do so. In order to work towards such goals, it is necessary to look at the geo-political security and military related issues objectively. The Centre for Air Power Studies (CAPS) has been publishing the Asian Defence Review to fulfill this need. This volume, a resource base for both the professional and general readers, is the ninth in the series under this title. It aims to add to the pool of information and knowledge in the current strategic discourse dealing with military strategy, defence politics and trends in military capabilities that impact Asia. In particular, it covers some of the important issues related to India's security environment: the Indian Air Force, cyber warfare, nuclear security, warfare technologies, export control regimes, Russia, China and Pakistan.
