City Bountiful A Century Of Community Gardening In America:

City Bountiful Laura J. Lawson, 2005-05-30 The social history of American cities would not be complete without a full account of the rise of community open spaces Lawson does exactly this by providing a compelling and poetic account of the history and making of urban gardens Combining solid scholarship with engaging images of the gardens and stories of their makers this book sheds new light on the value of urban open space More important it explains why community gardens need to stand alongside city parks as permanent open spaces Essential reading for community developers and landscape architects as well as anyone who ventures outside enthusiasm and shovel in hand to improve their local environment Mark Francis author of *Urban Open Space* and *Village Homes* The definitive history of the past hundred years of America's experience with community gardens A labor of love by a garden activist the book appears at a most appropriate time today our city dwellers and suburbanites are retreating onto carpets of passive open space tended by homeowner associations and lawn care outfits Lawson thoughtfully analyzes the weaknesses of community gardens when used as a response to social crises and by contrast investigates community gardens as an alternative to today's managed care of open space Her history clearly presents a way of community living that we can elect if we choose her wisdom Sam Bass Warner Jr author of *To Dwell Is to Garden* An important book about how the urban gardening movement is transforming our landscape and reconnecting us to the land Alice Waters Owner *Chez Panisse*

Gardens Robert Pogue Harrison, 2008-11-15 Humans have long turned to gardens both real and imaginary for sanctuary from the frenzy and tumult that surrounds them Those gardens may be as far away from everyday reality as Gilgamesh's garden of the gods or as near as our own backyard but in their very conception and the marks they bear of human care and cultivation gardens stand as restorative nourishing necessary havens With *Gardens* Robert Pogue Harrison graces readers with a thoughtful wide ranging examination of the many ways gardens evoke the human condition Moving from the gardens of ancient philosophers to the gardens of homeless people in contemporary New York he shows how again and again the garden has served as a check against the destruction and losses of history The ancients explain Harrison viewed gardens as both a model and a location for the laborious self cultivation and self improvement that are essential to serenity and enlightenment an association that has continued throughout the ages The Bible and Qur'an Plato's Academy and Epicurus's Garden School Zen rock and Islamic carpet gardens Boccaccio Rihaku Capek Cao Xueqin Italo Calvino Ariosto Michel Tournier and Hannah Arendt all come into play as this work explores the ways in which the concept and reality of the garden has informed human thinking about mortality order and power Alive with the echoes and arguments of Western thought *Gardens* is a fitting continuation of the intellectual journeys of Harrison's earlier classics *Forests* and *The Dominion of the Dead* Voltaire famously urged us to cultivate our gardens with this compelling volume Robert Pogue Harrison reminds us of the nature of that responsibility and its enduring importance to humanity I find myself completely besotted by a new book titled *Gardens An Essay on the Human Condition* by Robert Pogue Harrison The

author is one of the very best cultural critics at work today He is a man of deep learning immense generosity of spirit passionate curiosity and manifold rhetorical gifts Julia Keller Chicago Tribune This book is about gardens as a metaphor for the human condition Harrison draws freely and with brilliance from 5 000 years of Western literature and criticism including works on philosophy and garden history He is a careful as well as an inspiring scholar Tom Turner Times Higher Education When I was a student my Cambridge supervisor said in the Olympian tone characteristic of his kind that the only living literary critics for whom he would sell his shirt were William Empson and G Wilson Knight Having spent the subsequent 30 years in the febrile world of academic Lit Crit I m not sure that I d sell my shirt for any living critic But if there had to be one it would unquestionably be Robert Pogue Harrison whose study *Forests The Shadow of Civilization* published in 1992 has the true quality of literature not of criticism it stays with you like an amiable ghost long after you read it Though more modest in scope this new book is similarly destined to become a classic It has two principal heroes the ancient philosopher Epicurus and the wonderfully witty Czech writer Karel Capek apropos of whom it is remarked that whereas most people believe gardening to be a subset of life gardeners including Capek understand that life is a subset of gardening Jonathan Bate *The Spectator*

Community Gardening in an Unlikely City Tyler Schafer, 2020-12-10 Community gardening is as much about community as it is gardening and compared to growing plants cultivating community is far more difficult In *Community Gardening in an Unlikely City The Struggle to Grow Together in Las Vegas* Schafer documents his time as a member of a fledgling Las Vegas community garden and the process through which a rotating group of gardeners try to forge community He demonstrates the ways in which choices gardeners make about what goals to pursue or who belongs or what story to tell about their collective efforts influence how they and others experience and interpret the garden The garden culture that emerges over time shapes how or whether community is practiced at the garden and has important consequences for the gardeners abilities to connect with the low income Black and Latinx community in which it is located Schafer s analysis provides important insights about urban culture the environment and food justice in the American Southwest and a sober look into the often messy process and practice of community

Sustainability in America's Cities Matt Slavin, 2013-02-22 Sustainability is more than the latest green buzzword It represents a new way of viewing the interactions of human society and the natural world *Sustainability in America s Cities* highlights how America s largest cities are acting to develop sustainable solutions to conflicts between development and environment As sustainability rises to the top of public policy agendas in American cities it is also emerging as a new discipline in colleges and universities Specifically designed for these educational programs this is the first book to provide empirically based multi disciplinary case studies of sustainability policy planning and practice in action It is also valuable for everyone who designs and implements sustainability initiatives including policy makers public sector and non profit practitioners and consultants *Sustainability in America s Cities* brings together academic and practicing professionals to offer firsthand insight into innovative strategies that cities have adopted in

renewable energy and energy efficiency climate change green building clean tech and green jobs transportation and infrastructure urban forestry and sustainable food production Case studies examine sustainability initiatives in a wide range of American cities including San Francisco Honolulu Philadelphia Phoenix Milwaukee New York City Portland Oregon and Washington D C The concluding chapter ties together the empirical evidence and recounts lessons learned for sustainability planning and policy

From the Ground Up Efrat Eizenberg, 2016-04-22 Little known and hidden between skyscrapers and wide avenues some 650 community gardens dot New York City Set within one of the densest and most expensive real estate markets these gardens are attended by some of the least advantaged residents of the city Urban residents use these spaces for horticulture recreation social gatherings and artistic and cultural events They manage the gardens collectively and with relative independence from top down control Despite continuous threats from market forces the gardens have been able to thrive as significant community spaces since the 1970s This book shows how in the process of attempting to protect these highly contested spaces residents developed as community leaders and urban activists Taking an interdisciplinary approach to follow the political development of urban residents the book examines how everyday spatial practices social interactions the production of alternative urban space and the generation of new urban knowledge render community gardeners into important social actors in the urban scene The book argues that with this process of production of space a new type of organic resident evolves These urbanites constantly engage with their urban environment find ways to make the city more supportive for their collective needs and produce the city in their own image Community gardeners as organic residents claim their right to the city act to materialize their vision of the city and utilize the special potential of the locale to constitute themselves as powerful social actors on the urban scene

[Planning for Equitable Urban Agriculture in the United States](#) Samina Raja, Marcia Caton Campbell, Alexandra Judelsohn, Branden Born, Alfonso Morales, 2024-03-19 This open access book building on the legacy of food systems scholar and advocate Jerome Kaufman

examines the potential and pitfalls of planning for urban agriculture UA in the United States especially in how questions of ethics and equity are addressed The book is organized into six sections Written by a team of scholars and practitioners the book covers a comprehensive array of topics ranging from theory to practice of planning for equitable urban agriculture Section 1 makes the case for re imagining agriculture as central to urban landscapes and unpacks why how and when planning should support UA and more broadly food systems Section 2 written by early career and seasoned scholars provides a theoretical foundation for the book Section 3 written by teams of scholars and community partners examines how civic agriculture is unfolding across urban landscapes led largely by community organizations Section 4 written by planning practitioners and scholars documents local government planning tied to urban agriculture focusing especially on how they address questions of equity Section 5 explores UA as a locus of pedagogy of equity Section 6 places the UA movement in the US within a global context and concludes with ideas and challenges for the future The book concludes with a call for planning as public nurturance an approach that can be illustrated through urban agriculture Planning as public nurturance is a value explicit process that centers an ethics of care especially protecting the interests of publics that are marginalized It builds the capacity of marginalized groups to authentically co design and participate in planning policy processes Such a planning approach requires that progress toward equitable outcomes is consistently evaluated through accountability measures And finally such an approach requires attention to structural and institutional inequities Addressing these four elements is more likely to create a condition under which urban agriculture may be used as a lever in the planning and development of more just and equitable cities This is an open access book This is an open access book *Landscapes of Change* Roxi Thoren, 2014-12-21 Climate change natural resource use population shifts and many other factors have all changed the demands we place on landscape designs Projects now have to help connect neighborhoods absorb stormwater cool urban centers and provide wildlife habitats *Landscapes of Change* examines how these challenges drive the design process inspire new design strategies and result in innovative works that are redefining the field of landscape architecture In 25 case studies from around the world Roxi Thoren explores how the site can serve as the design generator describing each project through the physical material ecological and cultural processes that have shaped the site historically and continue to shape these ground breaking projects *The Routledge Companion to Environmental Ethics* Benjamin Hale, Andrew Light, Lydia Lawhon, 2022-07-29 Written for a wide range of readers in environmental science philosophy and policy oriented programs *The Routledge Companion to Environmental Ethics* is a landmark comprehensive reference work in this interdisciplinary field Not merely a review of theoretical approaches to the ethics of the environment the Companion focuses on specific environmental problems and other concrete issues Its 65 chapters all appearing in print here for the first time have been organized into the following eleven parts I Animals II Land III Water IV Climate V Energy and Extraction VI Cities VII Agriculture VIII Environmental Transformation IX Policy Frameworks and Response Measures X Regulatory Tools XI

Advocacy and Activism The volume not only explains the nuances of important core philosophical positions but also cuts new pathways for the integration of important ethical and policy issues into environmental philosophy It will be of immense help to undergraduate students and other readers coming up to the field for the first time but also serve as a valuable resource for more advanced students as well as researchers who need a trusted resource that also offers fresh policy centered approaches

Remembering, Forgetting and City Builders Haim Yacobi, 2016-04-08 *Remembering Forgetting and City Builders* critically explores how urban spaces are designed planned and experienced in relation to the politics of collective and personal memory construction Bringing together case studies from North America South Asia Eastern Europe and the Middle East the book analyzes how contested national ethnic and cultural sentiments clash in planning and experiencing urban spaces Going beyond the claim that such situations exist in many parts of the world because communities construct their past memories within their current daily life and future aspirations the book explores how the very acts of planning and urban design are rooted in the existing structures of hegemonic power With contributors from the fields of architecture geography planning anthropology and sociology urban studies and cultural studies the book provides a rich interdisciplinary view into the conflicts over memory and belonging which are spatially expressed and mediated through the official planning apparatus
