**Decentralization, Democratization, and Informal Power in Mexico** Andrew Selee, 2015-10-20 In the last two decades of the twentieth century many countries in Latin America freed themselves from the burden of their authoritarian pasts and developed democratic political systems At the same time they began a process of shifting many governmental responsibilities from the national to the state and local levels Much has been written about how decentralization has fostered democratization but informal power relationships inherited from the past have complicated the ways in which citizens voice their concerns and have undermined the accountability of elected officials In this book Andrew Selee seeks to illuminate the complex linkages between informal and formal power by comparing how they worked in three Mexican cities The process of decentralization is shown to have been intermediated by existing spheres of political influence which in turn helped determine how much the institution of multiparty democracy in the country could succeed in bringing democracy closer to home *Decentralization, Democratization and Informal Power in Mexico, de Andrew Selee, University Park Pennsylvania, The Pennsylvania State University Press, 2011, 191 Pp* Matthew R. Cleary, 2012 *Decentralization, Democratization, and Informal Power in Mexico* Andrew D. Selee, 2011 Explores the democratization and decentralization of governance in Mexico and finds that informal political networks continue to mediate citizens relationships with their elected authorities Analyzes the linkages between informal and formal power by comparing how they worked in three Mexican cities Tijuana Ciudad Nezahualc yotl and Chilpancingo Provided by publisher *Decentralization and Democratic Governance in Latin America* Joseph S. Tulchin, Andrew D. Selee, 2004 **The Paradox of Local Empowerment** Andrew Dan Selee, 2006 This dissertation examines whether decentralization to municipal governments in Mexico has improved democratic governance The research examines the effects of decentralization on democratic governance in three Mexican cities Tijuana Ciudad Nezahualc yotl and Chilpancingo and draws on key national indicators The findings indicate that decentralization has significantly increased the authority and autonomy of Mexican municipalities but that these changes have not necessarily led to local governments that are responsive and accountable to citizens or allow for citizens active engagement in public affairs Further analysis of these findings suggests that municipal political institutions create few incentives for public authorities to be responsive and accountable to citizens The use of closed party lists prohibitions on independent candidacies guaranteed supermajorities for the leading party and the prohibition on reelection all combine to undermine accountability and responsiveness In this environment public authorities tend to be more concerned about party leaders than citizens As a result citizens continue to be linked to local governments through political brokers within the principal political parties and there are few real opportunities for citizen engagement outside of these mediated channels despite the nominal existence of elaborate participatory planning processes Nonetheless the study also finds marked differences in the way that citizens are linked to the political system in different cities Where strong social organizations existed prior to decentralization citizens

are more likely to have effective albeit indirect channels for voice in public affairs Where these social organizations are linked closely to the principal political parties they are even more likely to influence public policy than where these organizations are highly autonomous Strong social organizations provide a necessary basis for ensuring citizen voice but their li

**Decentralization In Mexico** Victoria Rodriguez, 1997-09-05 Although Mexico was once recognized for the stability of its strongly centralist one party political system events occurring since the mid 1980s have made it increasingly difficult for both the government and the ruling party to sustain legitimacy and credibility This book assesses the impact of decentralization on Mexico's intergovernmental relations and examines the constraints upon the devolution of political power from the center to the lower levels of government It also discusses the distribution of power and authority to governments of opposition parties within the context of a more open political space Victoria Rodriguez uncovers a new paradox in the Mexican political system retaining power by giving it away She argues that from the beginning of the de la Madrid presidency 1982 1988 to the end of the Carlos Salinas de Gortari administration 1988 1994 the Mexican government embarked upon a major effort of political and administrative decentralization as a means to increase its hold on power to centralize by decentralizing However since the beginning of the presidency of Ernesto Zedillo 1994 2000 it has become increasingly clear that the survival of the ruling party and indeed the viability of his own government require a genuine de facto reduction of centralism For Zedillo and future political administrations decentralization in some guise will have to be a key ingredient of any attempt at modernization in contemporary Mexico
