

DEEP SEA ELECTRONICS

5210 AUTO START MODULE

Issue 2
18/12/02 VH

FEATURES

- > **Comprehensive remote communication via optional RS232 port. Provides RS232 Modem link to PC via either PSTN line or GSM network (using a suitable modem). The module can also signal Engineers via their cell phones using the GSM SMS messaging system to advise of system alarms.**
- > **Optional RS485 'Modbus' output. Using industry standard communication protocol allows full system integration into new and existing building management and control schemes.**
- > **Module provides a number of control and monitoring features with expansion capabilities to meet with more demanding specifications. The ideal choice where a remote communications control system is specified (when used with one of the comms output options above).**
- > **Power measurement is included in the comprehensive specification (detailed right).**
- > **Clear icon based language free display provides access to full gen-set instrumentation**
- > **High-Bit LED technology is utilised to provide at a glance diagnosis of fault conditions and operating state.**
- > **Front panel programming of trip points and timers, allows field changes to be made to the module settings.**

The 5200 series modules have been designed for **front panel mounting**. The module is fitted into the cut-out with the fixing clips removed. These are then fitted from the rear. Connection is via locking plug and socket connectors.

DESCRIPTION

The Model 5210 is an Automatic Engine Control Module. The module is used to automatically start and stop the engine, indicating the operational status and fault conditions, automatically shutting down the engine and indicating the engine failure by means of an LCD display and a appropriate flashing LED on the front panel. Selected timers and alarms can be altered by the customer from the front panel. Alterations to the system are made using the 810 interface and a PC. This interface also provides real time diagnostic facilities.

It is also possible to monitor the operation of the system either locally or remotely. (Optional Remote Communications output versions only).

Easy pushbutton control

Operation of the module is via pushbutton controls (with security locking facility) mounted on the front panel with STOP/RESET, AUTO, MANUAL and START pushbutton. The first three pushbuttons feature LED 'selected' indications. Further pushbuttons provide LCD DISPLAY SCROLL and EVENT LOG VIEW functions.

Microprocessor control

The module features 16-Bit microprocessor control and a comprehensive list of timers and pre-configured sequences. This allows demanding specifications to be achieved. Configurable expansion facilities are also provided.

Metering

The 5210 module provides metering via the LCD display with the following instrumentation displays, accessed via the LCD DISPLAY SCROLL push-buttons:

Generator Volts L1-N, L2-N, L3-N
Generator Volts L1-L2, L2-L3, L3-L1
Generator Amps L1, L2, L3
Generator Frequency Hz
Engine Speed RPM
Engine Oil Pressure
Fuel Level %
Engine Temperature
Plant battery Volts
Engine Hours Run
Generator kVA
Generator kW
Generator Cosφ

Event Log

The instrumentation displays are supplemented further by EVENT LOG VIEW, which shows the last 15 shutdown events along with date and time of shutdown.

LED indication

'Red-to-It' icons are used to show the presence of alarm conditions detected by the module.

In addition 4 uncommitted LCD segments allow the user to configure the module to provide other status indications from either internal states or from external digital inputs.

Digital Inputs

The module accepts the following digital inputs:
Emergency Stop Input - A N/C DC positive input
Fully configurable warning or shutdown inputs
With the exception of the Emergency Stop input, these are configurable to be either N/C or N/O contacts connected to the -V_e DC. The 6 fully configurable auxiliary inputs can be selected to be indication, warning or shutdown inputs either immediate or held off during start up to allow for use as protection expansion inputs. Alternatively they may be configured to control extra functions such as Lamp Test or Remote Start input, and many others - refer to appropriate manuals for details.
