Butler, 2012-02-20 For nearly two decades *Television Critical Methods and Applications* has served as the foremost guide to television studies Designed for the television studies course in communication and media studies curricula *Television* explains in depth how television programs and commercials are made and how they function as producers of meaning Author Jeremy G Butler shows the ways in which camera style lighting set design editing and sound combine to produce meanings that viewers take away from their television experience He supplies students with a whole toolbox of implements to disassemble television and read between the lines teaching them to incorporate critical thinking into their own television viewing The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television Highlights of the fourth edition include New chapter and part organization to reflect the current approach to teaching television with greatly expanded methods and theories chapters An entirely new chapter on modes of production and their impact on what you see on the screen Discussions integrated throughout on the latest developments in television s on going convergence with other media such as material on transmedia storytelling and YouTube s impact on video distribution Over three hundred printed illustrations including new and better quality frame grabs of recent television shows and commercials A companion website featuring color frame grabs a glossary flash cards and editing and sound exercises for students as well as PowerPoint presentations sample syllabi and other materials for instructors Links to online videos that support examples in the text are also provided With its distinctive approach to examining television *Television* is appropriate for courses in television studies media criticism and general critical studies **Consumers, Competition, and Consolidation in the Video and Broadband Market** United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications, Technology, and the Internet, 2011 **Captive Audience** Susan Crawford, 2013-01-08

Ten years ago the United States stood at the forefront of the Internet revolution With some of the fastest speeds and lowest prices in the world for high speed Internet access the nation was poised to be the global leader in the new knowledge based economy Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed dozens of countries including Japan and South Korea to pass us in both speed and price of broadband This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market it also threatens the economic future of the nation This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high speed Internet access Using the 2011 merger between Comcast and NBC Universal as a lens Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago In the clearest terms this book explores how telecommunications monopolies have affected the daily lives of consumers and America s global economic standing
